

## GDL April 26, 2023

What scarce and going to be the I can't do what you do What's that Get a clap on Welcome Welcome to Good Day Live Today is Wednesday April 26th 2023 We're so happy You're in the studio with me and the Kyle True Blood I'm Michelle Mira We're just tuning in for the very first time Welcome Welcome to our show We're filming live in Los Angeles California We got the chat Let us know where you're tuning in from We want to connect with you and see how your Wednesday is doing You got the day right And the date the date and the date right Um I'm great We have a very exciting guest today Um And but other than that I'm just great to be here and to be here with you Um This is our guest Uh Mr Albert Preso 0000000 my new side job is introducing people apparently in arenas on the left side you could be pretty good at that You know it was an MC for Bar Mitzvahs But like if we I think it's a little sexist that we always have men introduce the men coming out 100% should be Probably got a woman out there You you want me to try to do it again You could try it out And today on Good day live Mr Albert What's the name Bruce Buffer Bruce Buffer He's the guy who's famous in tagline is let's get ready to rumble No no no no no no The actual what Bruce Buffer would say before every boxing match pay per view for like 2030 years and then his brother does UFC Look what do you know it's to to to start the show And I'm thinking I got we got the brothers basically covering all the sports but we got a woman in there Yes I was love to be that woman I would love to be that woman Pretty good Pretty good Thank you How are you today Go to Las Vegas You and how do you do it You the crowd goes wild and you go like this Wait do it one more time guys do it one more time for the cheap seats in the back I love you so much I love you so much Just hearing his voice like it just it just brings me like I feel like I paid for pay per view You just feel like you paid to be part of this I got the popcorn I got the boys got the got the beer Let's watch the fight Let's watch the fight Well there's no fighting today Uh today is all about um this is brother this is brother It was for my family It was oh my God What I of wow From the solar HSP Just be sick I don't know how to process a Oh yeah Oh yeah Oh yeah Oh the testosterone this building is so and turn Oh yeah Oh yeah Oh yeah Oh yeah The test road is so and to Oh yeah I'm from Jersey Oh yeah Oh yeah Oh yeah I want your mom's number so badly so I can share the things that bring me joy about you and also drive me nuts Bring the pad I can't imagine what Bucker mom was like uh raising those two boys They were

both probably just screaming the entire day was like and then the other one's like let's get ready to rumble No they probably had dinner and it's like it's time on dinner Oh and then like the brother is like you you know and the kids and the mom's like oh what if she was like one of those moms Like you know what Keep doing that You're gonna do that one day honey Maybe I hope so You know I think I think you know you never know You never know why we uh were planted into the families that we were planted into Um I think to uh to learn big life lessons but that's a whole another topic Um how is your how how's your how's your Wednesday going kai better now that I heard the buffer brothers Oh yeah You feel you feel good Yeah You know it's a hump day Sure You feel the workload the most on a day like today Yeah Yeah Yeah You know you got the uh got a couple of jobs So yeah a couple of tasks to do today A couple of tasks to do not gonna gonna keep the head down keep moving forward Well can I tell you yesterday Uh I went with Andy because that's you know the spots apparently Um and uh while we were there we ran into Asher If you guys don't know who that is he was on He doesn't sleep He doesn't stop talking I didn't think they went together He's a really interesting guy Apparently They do and I met his wife She's lovely and it's so funny How are you doing I don't really know other than like they travel a lot I like I like how he doing Yeah He like does he work I was like asking Andy I was like does this guy work Like because he's always inappropriate question Angel Angel Angel No work here We like the two like what Speak for your speak for other people Classes in this town their classes they class I'm sure you know there's people that don't work didn't you No What You don't get it No I've never not worked but you know people who have not ever worked and they drive me nuts do they Yes they do Well I mean listen I also like I had a hard time with like uh a situation where the person didn't like really have to work and I was telling my best friend she was like is that what you want Like do you want that work ethic in your world And but then she was like you can't blame the person and you said this too that they came from you know abundance So I can't blame that But for me it's all about it's all about work ethics Maybe I still trust on Maybe I would be working I wouldn't even know what a check is working I'm kidding Oh I was holding you to such high Oh I don't know when you're joking or not I'm not throwing out any government names Please don't because I do all that I'm not even telling them to you because you will throw them out But the point is is that I have a friend She's dating him a man a man child whatever have you Um yeah Comes from money comes from abundance

Trust fund Ok All right Where are we going with this They've been dating She's very ambitious and now it's coming to a point of the dad of her father is like I guess he has money but like what does he want to do Like it's not to the dad even He was like I don't care about the money really I need to know he's ambitious It's so important And I found that really interesting The dad made money did It was so it was like from the dad from the grandfather from the grand But the but the dad dad has money now now now the kid has money She's dating the son right But does the dad have like the drive to his dad Yeah No like her dad her dad her dad earned the money Yeah I thought you said he came from trust fund That was from grandfather to dad I got it Got it got it Yeah Yeah Yeah He's like but I find it so interesting because the catch 22 is like personally if I had a daughter and she found a trust fund baby I was like listen instill the ambition in him But dad he has no ambition He'll learn Ok the fund is there I think after the age of 25 it's ok Ok Go ahead What do we need ambition for If the finances are there you need ambition for life otherwise you're going to be miserable You should also find I was trying to pull that out of you You get that response out But it's true Like if you know there are so many people that have everything that don't have passion It's like because like the same money buys happiness but it's like does it but I'd rather be miserable and rich than miserable and poor one Would you rather be happy and poor or miserable and rich Um you know that's a great question Miserable And I would take miserable and and I'll tell you why because you buy a box of Kleenex because because you you can train your brain to be happy and you become more grateful for the thing You you can look the only friends I've ever lost and this is gonna get a little personal sorry for you guys out there The only the only friends I've ever lost or trust on babies I I mean that's a thing It's a it's a real thing but like I do believe like with the right uh right Uh training the right coaching the right Can I tell a story Can you retell a joke from Dave Chappelle Of course say it was from Dave Chappelle I like Dave Chappelle's joke I did this I know a guy Well let me start the joke off Wait wait Is this the guy Anthony Bourdain Oh this is sad Can we change the topic Ok OK OK OK OK OK OK OK OK OK Because he he had abundance This man flew around the world and ate whatever he wanted He ate delicious food with iconic beautiful people models models Anthony Bourdain He's an actual role model to me to this day He passed by his own hand Yes Now Dave Chappelle knew a guy from ok he was a genius but he grew up with nothing and he got Straight A's and he went all the way to law school and he was gonna graduate and he met a woman in the middle of law

school and Dave said save her for later in your life And he didn't save for later How do you OK I'm gonna stop you There there is no such thing as saving anyone because let's go on with the story We're gonna learn You need to save her You can't save people He means his move slower Ok Not put her in a refrigerator Ok Thank you Well maybe we should talk to Joe Goldberg from you and see if that's a thing Maybe he knows Ok All right We have them on our show 100% Only bearded only bearded She likes the cute one No I like the beards There's something about a beard that just like does it for me Um you gonna clean this Wow Wow I'm not doing anything like Tom Sando Vat Listen I just told you I like beards and you're telling me you're gonna shave tomorrow I think you would still be like you know and I was thinking maybe we could kind of like have a placement No no I would never say that it's the beard No you've never you haven't always had this It's gotten bigger It's gone through stages and phases stages But I think no day one you did not have that You didn't have that Yeah And we love you if you're watching it And um she might have played one You know what I'm saying Is is that like uh I have like fought with like my teeth and my hands I'm like no Kyle I said a tooth and nail and my hands and my feet Oh my gosh that was that might have been the cutest thing I've ever heard I thought it was my hands and my teeth It's called finding tooth and nail on feet But this is my thing Like I've always said like you know I I get on you for a lot of things But I but I love our dynamic on this show and I do think I do think you and I have what's called a chemistry and you can't make that up You can you can try to create it But uh but you can be in the middle of a joke with someone that you have chemistry with and and you and you can continue the joke Continue the joke Go kid go tell us a joke So he was a genius He met a girl We stopped at saving right where we're not putting it on the tupper wear slower slower when he got married and then he got divorced before he even graduated law school So had nothing is he a guru Like how is he How he what do you mean He knew every every guy knows bro wait till you have the cash because she'll leave you She won't there's an 85% tile chance she'll leave you If you do not have the funds you don't have the funds Yes What did It's part of the relationship a man's job is to provide If you can't provide it's going to create resentment especially over a course of years and she may leave Well maybe he provided Ok continue point was he was like save her And then he didn't he married her he got married with nothing and she still took half of that half of the half of the nothing Ok Well he grew up the press After that he graduated he was ruined by the divorce and 10 years later

Dave's going to the Foot Locker guess who's working at Foot Locker This guy he's got the referee shirt everything Mind you he's 45 years old mind you He's 45 years old And that's not the point of the story The point of the story is well ok he's living at his home with his mom but he has a law degree The point of the story is this guy never killed himself Thank God Where is this What you compare it to to Anthony Bourdain who lived a lavish lifestyle compared to this guy who has a very crappy life and he's still here The point is you just never know what's going on in someone's brain Exactly So like that's what I have to go back to You just never know what's going on behind the eyes and you have to treat people with kindness and respect no matter where they are and whatever they're doing point blank ping when we were talking about um Haley Bieber Haley Bieber last week And I was like how could she have it tough We don't know we don't I mean I told you this that like back in uh it goes back to ancestral times where like you want approval from other people in your tribe because those people will help you stay alive And it used to be very small It used to be like 10 to 30 people max Um Now it's like oh you want approval from millions and that is not normal It's it goes like it goes up and beyond But anyway yeah you're right You're totally right You're totally right Thanks guy Um Shall we get into some entertainment news Let's go Let's get into some entertainment news Um This is super super super no matter what life hands you you can always count on your closest friends to be there Oh thank you My purse was exhausted This is the trailer for Sex In the City Uh Season two just dropped and just like that Let's take a listen change Life is full of surprises I'm ready to lose my virginity Excuse me That the list What list There's a whole brew ha ha at school about this milk list For real Our lunchtime fodder is not usually this low brow I swear Really Who have you been eating with It's a big step up for Shay And he I've been having exit out of grief sex It's just sex through all the chance that you've been out there Men have feelings too Life's too short not to try something new And just like that I realized some things are better left in the past but maybe not everything Oh my gosh Oh my gosh Oh my gosh Ok This looks amazing I'm so excited you know and just like that came out I I I'm happy they took all my feedback because and just like that season one they were like it just showed too much reality of women of a certain age Right Like at times which I think is important to show but they leaned into it Like Carrie broke her hip Like she's only she's only 50 Like that's maybe that is a thing That is a thing Oh I'm sorry She's 55 But like I think it's a thing but she's all too young I mean but you know you know I think these things

happen What as a writer you're like I don't how old Carrie is We need to we need to rope in the 20 the 20 year olds above Carrie and the 20 year olds below of course And the only way to do that is the breaker hit It's a breaker Hi Well I'm excited about this very much so because one our friend who plays Harry we met down the street and um and in the city was a huge inspiration to me as a writer Um I remember watching that show like am I allowed to watch this show And then my mom would start to watch it with me And I was like wow I feel really uncomfortable now you feel like it's a writer show It's a writer show It really is No I don't think it's a writer show It inspired me to write a show right I feel like people that are writers like sex in the city and shows like that brilliant and I'll tell you why because what they would do is and this is how they would set up the writers room Uh They would come in a Dan star would have all the writers come in and be like what did you do this weekend And they were all females and they would tell stories of what they did over the weekend and then they would interject where it would go for which character So they were pulling from real life experiences from women in their thirties or or whatever um uh late twenties early thirties and then like interjected into the story and what I love about it is that the characters they grew like so like the characters grew as life grows Um but I think for me sex in the city has always been about fantasy Right Like I don't wanna be like I if I want the news I'm gonna watch the news If I wanna see things like broken down I don't wanna watch sex Sex in the city to me is like it's like a fantasy for your eyes Like I'm talking about the clothes and the shoes It's like yes Darren star created in Paris Yeah So like for me uh seeing season two in the trailer got me so so excited Aidan is back Um I oh I I called you a at one point didn't I Yeah don't you remember I called you and Aidan I didn't even know what you're talking about when you were like you're an agent and I was like that's yeah you're an a you were like I'd like to be called Mr Big instead and I was like no that's not that's not a thing Like my entire life Like this goes all the way back to like sixth grade women would walk up to our girls at that point would walk up to me and be like they would just have their own codes and like at one point they were like you're a planet and I was like what what are you in at some point They were just like naming like hot guys planets and I like you're a planet and then so some guys would be like you're just an asteroid belt and then some guys would be like you're just the rings you're just you're like around the hot guys Like it was like yeah but you wouldn't know what they meant They'd just be like you're the rings you're the planet you're the sun da da da da da da da And you'd be

like ok fine whatever So when you were like you're in eight and I was like that's another code that's not a girl code word for something You are Nan Last night we ran into James Corden He's going off the air Uh this this Thursday Apparently it rough on celebrities in general This this past couple of years It has been But you know I um and I met this guy uh right outside of our studio This is Conan o'brien Uh he is honestly I met him for like two seconds Uh he was one of the nicest people I have ever met I was nervous I was shaking Um our buddy Bruce Cardenas was here yesterday and I was telling him how I I met Conan o'brien and uh would you actually wear this careful because they might get it for you know I put it on You also said that you would wear a tourky suit The Turkey suit never came and never Well we have to do that in uh Halloween of 2023 That purple on my skin would go great You look great You know you play nice Aladdin Yeah And those pants Oh yeah Look at a respectable length Oh yeah that's not too high Ok All right Cool Right under the cap Yeah Yeah Yeah Ok Cool I'm excited Um sash um here's a little bit more entertainment news Uh Ben Affleck and Matt Damon went broke six months after what Yeah they um they went broke six months after um goodwill hunting Um he thought we were not rich for life Um so it's interesting like you never know like at what point of life you are like I'm gonna I'm gonna play the the last video um that was just sent to me from the powers that be Mr Eddie Wman Let's see what you got let's see what you got Oh my gosh What is that Sarah Jessica Parker shoe store What is that Oh how dare you what You didn't bring me back a pair Are you mean or what What's happening You got Natasha Is that they're in Vegas of course they're in Vegas Is it S JP Are those her shoes Why are you doing this To me This is so mean This is kind of mean Andy I'm not gonna lie What I wish I what They went shopping without you 100% It's gonna happen Did she get those who got those who got those who got the who got those You know my size now Andy who got these shoes I'm ready for a new pair That's all I have to say This You're gonna make me so sad What's Sarah Jessica Parker You know I love that She leaned into This is this is this is torture What are you doing to me Andy this is not fair What Michelle I look look I bet you're talking about me I can hear it I can hear it talking about me 100% The sparkly ones You didn't get those Can we get those Oh my God OK So I've seen the sparkly ones Um I love them I love that SG JP has leaned into like who she is as a performer but also as an entrepreneur that she's created these business side hustles Um because I think she's she's known I conically for her shoes her character And so is so is she so so many people be like what's

the difference between you and uh and Carrie Bradshaw She's like I'm not Carrie Bradshaw but Carrie is Sarah Jessica Sarah Jessica is Carrie like they're so similar like the character and her little literally merged together Like so she she she is 100% Carrie Bradshaw Um Yes Uh I would like to I would I would very much like to get the sparkly shoes and yes I do Now I am Let's have this conversation later on the show I'm I'm grown after July 19th I can wear anything back to the show No I want sparkly shoes Oh sorry Minus Michelle's needs Hope I have fun out there It's ok It's ok I'll take myself shop I'll take myself shopping and record it And Kyle you wanna come with me and look at that Help me out What Oh this is so exciting after it's done Oh I don't wanna come Women's shoe shopping Oh that's so that's so me on Ok All right Right You know what I love Natasha I love Marisa They deserve all the good things that are coming to them and so do I um but that was that's that's I don't know how to respond Oh it's gonna happen No not them It was it was just like the you know ok You know what I mean Um This is k I thought of you uh because you want kids so badly Uh This must be what it looks like when you have no bills 100% Look at the look at the little head live my best life Um our guest today has three girls Um I'm gonna watch it one more time Um and I want you to ask what it's like to have three girls because you believe that you're gonna have three You know I think he wants 10 kids I don't know if he's gonna give me the uh perspective I'm looking for I'm interested Yeah maybe maybe we'll see we'll see we'll see uh happy to get him in That's an entire football team That is a football team You know when you're when you're famous like people come after you and you have lawsuits but also when you start your own business that's a thing Lawsuits Ed Sheeran is heading to trial over claims he copied Marvin Gaye Let's get it on This happens all the time I think I vanilla Ice Oh really He he did he pay Sting five grand a day for for uh for sampling a song of Stings that he had no he had no position to do and he did he made a career off of re calibrating uh you know tunes that were already existing The entire album was just like a refurbished kind of a tune That sounds cool I hope he has the right to all this stuff Right Right Right He does not he does not for the rest of the time He he pays Sting five grand a day Goodness that's a lot That's a lot So I'm wishing um our buddy Ed Sheeran all the best That's a normal thing in music You know I used to think this when I was a kid I used to be like mom are I remember asking this I was like are people just gonna run out of beats at certain points And she was like she was like I was like 56 Well because I was listening to beats and I was like you can't like I I get that you

can make more beats but like they're not infinite amount of rhythms You could use something And she was like no she's like you can always make new ones And I was like I don't believe it at a very young age I was apprehensive of like anyone's answers Yeah of course Yeah Well you've always been smart like that Um and this is uh what's not so great Um bed bath and beyond It's an end of an era They are shutting doors Um and it doesn't did you ever go to bed bath and beyond You know I went to bed bath and beyond I went to bed bath beyond three times maybe entire life just to see what's in there and it says it on the floor It's really cool I still want to see what's in there It's pretty cool you know like what's beyond the beyond the beyond price You should be ashamed of yourself No I think Amazon you know and we are on Amazon is what you know what really has happened is that people don't necessarily feel the need to go out and get what they need Amazon is regulating the market in certain ways Amazon we love Amazon We're all about Amazon and you can too shop our carousel as we're talking Beth and beyond didn't do any like partnerships with Amazon or try to do it online sales you know have a live show where we can try to sell their product You know it's a mistake You know what we all learn We all learn from our mistakes Be back and beyond If you want to come back and if you want to work with us we are happy to create a show around you and what you do I will try a new shampoo on none of my hair every day Oh good Because we have a we have a talk about a sponsor We have to talk to a sponsor after this People want to sponsor us so you can take a line you know take a number a number a number from that little box thing Take a number Um I I have to give a shout out to my friends Um This is epic Uh Our friends over Oh that's me Even like uh here we go Um Our friends at the bay have been nominated in category one for best dramatic series um at the daytime Emmys What's that Screenshot Oh really Ok I am looking nominated for an Emmy Congratulations to category one Category one That means they're competing with General Hospital Um All the other popular soaps Congratulations to Gregory J Martin Christos Wendy Bridge my buddy Wendy I'm so proud of you Brendan Beamer Um The the women's names uh is uh Crystal Sister Oh you're you're you're getting me on the spot Um But she's so adorable I love her Congratulations on that I assume she's about to have the baby Is this the music Nice We are so so so proud of you at the bay We love the bay We binged the bay as they release on to And we just want to give a very special Congratulations to our buddy Gregory J Martin Wendy Rich Christos and the rest of the cast and crew for putting on an excellent show We are so proud of

you Congratulations You are amongst incredible company and I hope you I hope you take it because you deserve it It's awesome I want to be there I want to be at the Emmys I you know I text messaged my buddy Wendy Rich last night Um and she responded at 11 p.m. She probably was out partying celebrating because she should be you know she's a show runner of General Hospital Um Oh and another congratulatory to our um our buddy um Mr Martech he has been nominated for best casting in a daytime television series Yeah that goes was no surprise One of the nicest nicest people I have ever met such a sweetheart and really gave us so much so much wisdom when he came on our show and he's so generous to actors and you know he came to you and he didn't come to you but he saw you in a play I really appreciate it And you then you were on General Hospital shortly after it was probably that's like the quintessential moment for me as an actor where it was like I got offered the play from you know actually can I tell a little story please please please all of my hard workers out there all of my dreamers because I was having a rough go at it and fast forward what was like about seven months and I'm on General Hospital and I'm talking about like probably one of the roughest parts of my life and just keeping my head down Staying true to what I believed in from the get go Seven fast forward Seven months I'm on General Hospital So anyway I was um I had nothing going on for like a year I think I was this is 2009 18 Uh I was dating a girl that was in the Redlands 90 miles outside of L A So it was like I know but it was taking me away from the business and I was I really was I booked like one commercial and like one music video for we were distracted too Yeah I was very distracted and I was very removed from you know I mean I think I lost two roles from not being in town They like hey can we see you today I was like hey can I come tomorrow And they're like sure And then they text me like later that night like hey we made the decision You don't have to come in tomorrow because someone showed up that day and like convinced them and that's how casting works anyhow And that's how casting works I was chasing a few films I was with this producer we were chasing films and uh he was you know I I was really with him on producing and creating this film to get started And uh he was kind of downplaying me in a lot of different ways like oh OK he would inadvertently tell me you're not the lead You can't be the you're not a lead mind you he's no one like he's not done anything before I had people that created like actual like 10 year old TV shows telling me I'm a lead So it was really like contradicting Yeah Yeah Yeah Uh We go into a meeting uh with a casting director popular casting director from NCIS and

we're trying to cast for this film We we're doing uh and I get broken up with two hours before I go to the meeting Well it wasn't like a breakup I went on a first date and the girl was like hey I don't really think we have a connection Uh Wait you said it was a break up though That's why I just I just said it technically it wasn't like a break up It was just a first date It was the first day you told me she didn't want to go on a second date but it was two hours before I went in there I was kind of like whatever And I was already a romantic and I was already having like a tough go at it Anyway We go in there and he's just downplaying me He's like oh Kyle is just here but I'm the guy you need to talk to and it was just like in my head I was just like whatever dude just like let's just get this done kind of a thing And I remember her looking at me a couple of times and just like turning your head and going back into the meeting gets calls me in two days later and goes I really enjoyed the way you dealt with the negative energy in that room I would like to work with you not him And and that was the first that was the first straw of like dealing with negativity in a very positive way It will get you to where you need to be It's really easy to be positive when things are working out Totally When things are not going your way when things look like you know you were wrong you're in the wrong place to still stay true to yourself I'm telling you good things are right on the other side of that door She offered me a play That's the one that offered me so much I love that so much I'm just I'm just checking because I think I have a message from our uh from our buddy um who's coming and he's on his he's almost here um which is exciting Um yeah because I because I was checking the time I just wanna make sure he was ok because because you know like people everyone has my number to make sure I always wanna make sure all of our guests are ok They know where they're going and all that Um I love that story about you because what's so great about you is you're so good at being in the moments and being able to navigate I don't know if you learn that from your mom or your dad your dad your dad Is he a Pisces He a oh a Leo and a Pisces That might be tough No we're like so alike Oh very Kindred Oh if we do have any disagreements or arguments I mean by this time he's he doesn't have the energy to argue with me anymore He's just like whatever fine But uh yeah we we we you know we're doing it I love it I love it and I love you Um you know who else we love We want to give a special congratulatory Miss Shery She Daytime Emmy nominee for hosting What I love about This is that Sherry has known that she has wanted to have a talk show for a very very long time She's also a slate v uh former host alum like her alma mater Yeah

Alma mater alma mater moder To to yeah I love that That's so cute Um but she's she's up for her first daytime Emmy along with Kelly Clarkson and Kelly and Ryan But like this to me is so special Can I read this Um there are no words to describe how I feel being nominated for outstanding daytime talk series host by the Emmys This is the first season the first season of the Sherry Show and to be nominated already all I can say is God is good Like Bey Smith says it gets greater later hashtag daytime I mean hashtag Sherry Show TV And I love that because Sherry I think um I think she's in her fifties right Andy Sherry is in her fifties Um It does get better later and but it's not about age It's about like you know consistently showing up and and if you believe in yourself to take the steps to make it happen um This has been a journey for her Um She's also really good friends with Sally Cologne Isn't that funny Yeah So um Sally I'm sure you're very proud of your bestie Um And we are uh we're proud to uh to know that she has been a sweet TV person Congratulations to Sherry Shepherd again I know she's put in a lot of hard work Uh This has been a long time coming Uh congratulations again Yeah Um should we get into some Kyle corner Yeah the last one we got here this is Aaron Rodgers It's a football play just so everyone has one of the best players in the game has now joined the Jets on their best year to join I'm telling you the Jets made their first playoff appearance in like 20 years last year and it's very advantageous for them to get Aaron Rodgers because the only reason the Jets did not make it to like the conference championship was because of the quarterback who is I am not behind Zach Wilson at all at all Wilson is a quarterback right now and he's cocky and he's new and he has no right to be that cocky and he better sit out and learn from the best Mr Aaron Rodgers himself He said three months ago they asked Zach they like Zach your position is in kind of question The Jets may bring in a veteran quarterback What do you have to say to that He goes oh I'm gonna make that guy a living I'm gonna make that guy's life a living Hell yeah Good luck This is Aaron Rodgers He's been to hell he is he not saying himself Wait why why are you saying that I'm just saying like you can't you're not gonna make Aaron Radner's life difficult like Zach what do you what world are you living in May it continue It's football We get we get piped up I see that I'm not even a Jets fan and I'm so happy for this I'm happy for Aaron Rodgers I'm happy for the Jets It's a fantastic match up What was this I said this to you You and I are not dating but I was just wondering would our energy level match each other So if I came up to you and started dancing with you push you away Look look look look how cute this is Look go look she initiated it and then

he's she chimes in You wouldn't do that with me You with me every day We we dance in every day You you're amazing at dancing Look look look look look look look see if her husband will match her energy at your We're work we're work spouses is what we come to the agreement of which seems appropriate but like this is hilarious Um and I always want to include you in everything and I just thought I said this to you and you your responses were not dating Like every time I send him something that's like relationship oriented he goes we're not dating and I said I know I'm just saying that this is what it feels like when I'm with you OK Anyway I just have love for you Of course it must be nice to have so much love thrown your way That's all the time you get out of here What was it Oh yeah Oh and then somebody came up to us and was like your girlfriend is so cute And you were like thank you And I was like and then I was like yeah and I told a handful But I told Andy I was like Kyle said that and I was like I was like Kyle we're not And he was like no what With it She just just OK I made it weird Oh we're not dating They're like oh sorry Uh Why did you skip one Wait no that's not Oh I sent this to you Um This is from Mario Lopez Um This is not you I refuse to argue with anyone born after 1995 Y'all can't even write in cursive guy What do you think It's true I don't want to hear what you have to say if you can't write and curse a pen Let me see You hold a pen See how you hold the before we get started What do they need a pen for So right What if the if electricity goes down can you still communicate on paper Of course Ok Let's get into Mark Kyle's corner What's this I don't even know what this is what you sent it to me I know what this is Uh this was last year's Met Gala I believe and and a couple of years ago a couple years ago Yeah Yeah Yeah And uh the theme was camp But I thought that was hilarious because we're mmm studios is building a workshop for kids and teens And uh we I was using the word camp and everyone was like oh it's not a camp Ok So I was like I I found it funny and then I saw a camp and I was like none of these people look like they're going camping This is the opposite This is literally this is literally this is campy It can't be but that doesn't make it What does campy mean it means over the top This is camp this is over the top for those who don't know Miriam Webster defines camp as a style or mode personal creative expression that is absurdly exaggerated and often fuses elements of high and popular culture right So like as you can see we got Kara Deline is a gentle nice comeback to her struggle with substance abuse I mean like what Trevor Noah what are you doing Come on Yeah What is this You can't just like do like a eyebrow What does it say This is all formality Oh OK I can see

where he's going with that but I'm a little not into that Billy Porter Well I mean that's how I want to be walked into the um that Gala is it the Gala or the Gala Gala Um Emma Stone I think Emma Stone can do no harm but I'm not a fan It looks like an everyday Like you asked me what Jared is going to come in What is this This is the head of himself Is he like making out with it towards the end with it And this was more than Jared Let I'll play that Miley and Liam I guess So That's no no longer together Uh Katy Perry dressed as a um a chandelier And um and then uh Harry styles you asked me this is the guy taking all the women right now I don't think he's taking all the women I think a lot of women are attracted to him And I told you why I think they're attracted to him is because he's very much in tune with the sexuality of who he is and what he wants I said you're very much like that too Like you know what you want you know who you are and you're very grounded in that Like you don't want anyone from that I don't think I can pull that suit off I can pull a lot of things off I don't I don't think you can pull that suit off either but I think he has a little bit of a feminine look though He's a he's a little so he's soft You he's a little light in the loafer sir Get out of here My mom used to say that I don't think that's appropriate talk but we're moving right along Um What's going on here Can we check this out No one has excuses Look at my look at my girl look at my girl that is going to be no excuses Get up This is gonna this is gonna be the future of Kim Hale for sure Look look look look but Kim has more moves Baby motion creates motion that keeps you Yes I mean how how look grandma ain't playing with us at all Never too late to get up off that and get up with that thing Look at the person to the left of her like really getting it Um There's a sale throw that out there because um I want a little inspiration for my elderly woman Yeah You know II I love I love all and I'm with you Never you're never pass your ami love it You're getting in line with M AM Is this future There's eight seconds to go in the game and she does this get a girl That's an that's an all boys That's a girl in a basically a boy heavy team Eight seconds left That's a save My daughter is gonna do that Yeah I think you're gonna have a great you're gonna have a great team of kids when the kid comes over and thanks her for making that save There's like eight seconds to go Look I'm serious This is a game saving goal save Oh my God she's on and she was like she's a she's a door but watch us Look at she's ready for it She's ready She's ready Didn't freeze in the moment she was she came at the ball She attacked him You look at the attack at the complete control Complete calmness Wow Fluid Rocking and rolling Yeah Yeah Yeah No I'm just so proud of her Yeah You're gonna be a great dad I

have really random facts You do What's this guy This is a box jellyfish Oh is this the one with the 8 20 No no no This is this only has four tentacles where most jellyfish I think are much more than that tentacle However this is the most poisonous jelly in the sea and it's the only jelly jellyfish that will follow you Most jellyfish just allow things to run into it like they don't they don't have any sense of like chasing prey this will chase you and it has the most um harmful venom So what it does is it actually attacks your nervous system and your heart at the same time How do you know it says it on the bottom It says it right there right Box jellyfish are infamous for their overpoweringly overpoweringly painful venom which is considered to be among the most deadly in the world Their venom contains toxins that attack the heart nervous system and skin cells Jellyfish are relatively relatives of true jellyfish but have cubic bell and extending from each lower corner on my true jellyfish So this isn't technically like a true jellyfish That complex uh true jellyfish They this one has complex eyes and they're active swimmers and a note to avoid obstacles and chase after prey which jellyfish don't really do Yeah I just find that really interesting It is I love animals It's very disturbing Too disturbing Yeah Can you imagine be swimming and and seeing this thing This is why I love the ocean But like at the same time I think about what was I thinking as a child What were you thinking as a child Right Oh This is me This is me This is me This is Kyle Trueblood Ok Let's get some audio Remember your dog is home alone Say it one more time when you're out having a good time But you remember your dog is home alone and she starts crying This is me Is that really you Oh my gosh Are you really that like I leave here every day at a certain time for my dog You know I love you so much You're gonna be such a good you can be such a good dad You're honey didn't you have a girlfriend That was like I hope you find a girl that you love just as much as you love So why didn't she say that to you That was my last relationship Did you not give this girl enough love Fair enough Did she feel like she was lacking that you gave Solara more so probably got more love Really That's why we're not together what I deserved it This person was mean Oh just saying we are never ever ever getting back together Good luck for her Yeah Yeah Yeah Yeah Yeah I I can't believe it I can't believe it Um but yeah we got some we got some more stuff more Yeah I think there's more stuff before we get our our buddy on Um you did Ok What is this Kyle What what is this What is this What is this I can't get behind this What is going on Oh here Ok Um oh this is this is for you Kyle I hate to break it to you but if you recognize any of these pictures you are officially old you're not old I

think BuzzFeed means anyone over the age of 19 This is not old by the way I don't understand I saw this I almost sent this to Good Day Live but I was like this doesn't make any sense Why Who wouldn't recognize a hot dog Recognize a hot dog I feel like I feel like there's certain people like 10 and 15 year olds like that's a hot dog Yeah So this is what BuzzFeed says that if you notice any of these you're officially old and you're welcome That is not coming from me that it is coming from buzzfeed Yeah Yeah Yeah Yeah Yeah So um yeah didn't didn't ring and that's OK That's quite all right Um I'm just going to pull this real quick Just just some of the weird things that are going on in on buzzfeed This is so strange 17 people who proudly share their fascinating body abnormalities like Aon Field rigor syndrome and supernumerary teeth Look at that Look at the eye I have 36 teeth You have 36 teeth Is that a thing you're supposed to have 32 I know Wait So look at that smile That's why they're so straight and together in those spaces because they they're jam packed So when did you get all 36 How old were you Wow It just means I kept my wisdom teeth That's really what you're just you're that full of wisdom OK That's what it is Um And then what's this guy What's going on here in Kyle's corner Oh This is just a myths We're we're we're we're gonna to debunk some myths OK Let's debunk some mess What do we got First one Yes Chewing gum Remember how people used to tell you if you swallow gum It takes seven years to actually pass I never heard that I see it all the time I just heard if you swallow gum you grow a gum tree OK That that sounds like Jeanie Yeah Yeah My mom would say that she would be like you're not chewing gum because if you swallow the gum you're going to grow a gum tree No no not going to happen You pass the gum like anything else Ok Ok Ok Ok Chameleons do not change color to match their surroundings They're actually the only animal that change colors that don't do it for their surroundings I thought they did that for their surroundings No everything else does Like the stick bug the octopus and a few other animals do try to camouflage with their surroundings to help Yeah Yeah Yeah They are attack prayers that or not be prey Millions do it to communicate to to who they change their colors But the reason why is they change their colors to match their surroundings is not the case The main reason is to regulate their temperature Wow I have no idea The reason is to communicate to me Wow Yeah Weird Right And we always call people like I call cash chameleon chameleon chameleon We love chameleons You guys can sleep well at night What what if we do Not Eight spiders in our lifetime That was I've never heard this before You've never heard that No Why are you

bringing up all the things I never want to hear ever in my lifetime What people say that like in your lifetime while you're sleeping you eat eight spiders spiders will crawl into your mouth But did you know why It's not a thing Because it's not a thing people say like you sleep your mouth open there's spiders everywhere Do you sleep with your mouth More spiders in the world than there are humans I'm pretty sure that's that is terrifying And that should that should be a movie Well I mean they're so small Arachnophobia It's a movie right It's a movie Jeff Daniels It's brilliant I have to watch it and I will not ever watch Spider Stay away from humans when we're sleeping because we're huge and they're not No they attack huge things all the time Spiders eat mice The mice are like \$10 That's you could catch a black widow wrap it up a mouse any day of the week But the point is what they stay away from us because of all this I thought I love animals I watch animal stuff all the time I have I have the DVD collection of Planet Earth You the DVD collection I think But we need to put ways that you can feel old saying I have a DVD You said you said you said when we went out when we went on a date you said that the flies have feelings and I wrote them down I wrote them down I was like I don't know about this guy I think it's inhumane to think any sentient being does not have feelings Well it's weird You know we have a lot of feelings for our next guest We're super excited for Mr Albert You super driven creator of the driven event An entrepreneur a dad All these great things Stay tuned I don't want you to miss this It's an excellent excellent story coming up after this We'll be right back Don't go anywhere Stay away because you're heartbeat Oh I know that they can hear So here is our Jari and box it You wanna get it charged up You use this fantastic charger over here This is the output over there and it has an extra cable like this with the ability to charge it in your car So that is really cool So we have it all charged up It has here you can press on the display You can see now that it is not drawing any power it is not bringing in any power and it is 99% charged which is cool So as you want to use all your separate things you can turn on the little lights and it will show you as you can see there that now you can draw power out of them or you can turn them off just like you would at home if you do if you wanna leave something plugged in but not having a draw power there you can turn it off So let's have some fun and see what our jay can fire up So in the past we have used the Jari to light up our lives with go We have charged our cell phones and we have done a few other things but oh we've even lit up the Arrow Garden How amazing is that that we were able to light up the Arrow Garden But today we're gonna

push the Jari to the limit and uh we are gonna take a look at the this works what's this This works That car vacuum Awesome Very cool And we could even take a look at Tabi used it And uh how amazing is this Oh my goodness You can just keep on going and going and going You can get into every little nook and cranny in your car with all of this How awesome So this is what we're gonna do We're gonna stick it into our query Let's do it this way So you guys can see what I'm doing Turn it on It's a little light and the display have gone on because we are about to fire this up Thank you Mr Jay There we go That is cool So let's see what else we can fire up today I mean that you can I mean that is just so cool You see powerful vacuum Jackie fired it up Let's have a look at some of the other things that we can um fire up today Let's see Here we go So let's try back to Good Day live Today is Wednesday April 26th 2023 We're so happy you're in the studio with me Kyle and I'm Michelle for just tuning in for the very first time and our special guest Mr Albert Pro Thank you Welcome to our show Thanks for joining us I have so much that I want to read about you because you're so you're an entrepreneur You're a dad you're a business owner Well entrepreneur all that stuff I just have to read this You're a business strategist entrepreneur the founder of the mortgage guys Um You are a start after public speaker business coach passion for helping others achieve their goals and reach their full potential You have over 15 years of experience in the mortgage industry I know you're only 40 years old Albert is known for his expertise in real estate finance leadership and marketing And you've been featured in various media outlets including Forbes Entrepreneur and the Huffington Post I can't even read half the things that you've done How are you Very good Thank you for having me and uh just blessed to be here Well we're blessed that you're here on our show Um It said 15 years ago you got into this mortgage actually more like 21 I was gonna ask because 15 would put you right at the collapse from the mortgage Like I started like around 19 like when I was 19 I'm I'm I just turned 40 a couple of weeks ago So thank you Were you when you were 19 Were you watching that packaging happen And then you were like what what's going on here with ABC And D packages for mortgages Well when I was 19 I was very new to to real estate So I I started as a real real estate assistant So I used to put the signs for the realtor and the and then just stay at the open house and and then I got discouraged a little bit because it wasn't as easy as I thought I got into real estate because I used to see all the realtors that drove BM BMW S Mercedes Rolex watches that show on million dollar million dollar listing show Yeah I don't think that was around

though because that was like a long time ago when I yeah when I was 19 it was like a long time ago So I started in real estate and then I transitioned to become a loan officer right after that I I didn't last as a realtor I didn't like it Ok Yeah Ok And loan officer to how did that transition into the next thing So I was a loan officer and I lost everything in 2008 So the mortgages the the not the ABC DS but the mortgages when when I started where we had a a an option arm Do you remember those No I don't Uh So we had an option arm mortgages So these were like negative So for exam for example like if you wanted to buy a million dollar home and you worked as a videographer we could say that you made 20,000 a month stated income So you didn't have to prove anything It was it was in full do full docs So it was just stated income And all you said is uh I make 20 K a month They would call your supervisor Does he work here Self employed Uh is he one of your sales people Yeah Yeah cool Yeah he does Ok cool 20 K a month you would qualify for a million dollar home but in order to pay that mortgage because a million dollar whole mortgage was let's just say 8000 a month So 8000 a month you wouldn't have to pay 8000 a month You would only pay 4000 a month and the extra 4000 would would roll over and go into your principal balance So we had people that would team up and let's say the mortgage was four grand a month It was supposed to be AAA grand but they'll have like four people living there and everybody would pitch in like 1000 1000 So people were living and mansions and then the properties were going up and then 2008 happens Boom and they correct all of that So that's what happened So my first uh little stint I made 260,000 my first year Yeah my 1st 12 months in in as a mortgage loan officer but then that didn't last I I lost everything after that Well that's did you see the picture Yeah Yeah Yeah I saw that essentially about you Yeah Yeah I mean not not not about you you personally right now but but about people like me it wasn't like the Wolf of Wall Street movie where it's about Jordan Belfort but it but it was maybe they did do it after me I don't know You know maybe you got royalties coming here Um That's really interesting though So you um you lost everything in 2008 that some of the country did a good part of the country did Um where did you go from there So when I lost everything I just I I was so embarrassed to go back to my parents' house because my my dad and my mom always told me don't get into real estate It's not like you think it is it's not BMW S and and Mercedes and Rolex and Girls It's not like that you should go to college because uh all your cousins and all the kids you grew up with they went to college and the right thing to do to become successful in and in this country is the American

dream Get your degree and make your 60 K a year and go work for a company Have security So that's what I that's what they they they always told me to do So I didn't want to be a failure and go back to them and tell them hey you were right I should have got my degree not dropped out of college and and avoided real estate but I didn't want to be a failure So I just decided to stay in my car for two months and it lasted two months After two months I got out of my car How did you feel when they used to tell you go to college and you had your own dreams your own play I hated it Right Right So how did you deal with that with with your parents telling you to do one thing And you had your own dream I was a big rebel II I used to run out of the house Uh I said I'm leaving I I used to uh throw tantrums I used to say I'm not gonna like III I didn't like if there's anything that I don't like in in this world it's a school like traditional school I love it Yeah I think I think you and myself are the same on that because I was taught at a very young age that I was a terrible writer communicator And this is what I do for a living I communicate like I tell stories I write stories I have host my own show Like I know I was watching your interview yesterday But for our viewers that are watching you two had a tough time as a little guy in school And why was that for you Well because when I grew up I didn't know any English I was born here so I'm Mexican American My parents are Mexican I'm first generation American and I didn't speak any English because my parents only knew Spanish So they taught me Spanish And when I was six they decided you know what I don't want you to go to school here locally because it's the ghetto you're gonna turn into a gangster 18th street and uh or not for Salvadorans I'm not Salvadoran I'm Mexican So I would go to 18th Street So they thought I was gonna be like an 18th street and and and do that So they said no you know what we're gonna send you to uh the Granada Hills and you're gonna take the school bus So at six I got into the school bus and I went to Granada Hills and it's the first time I've seen people like like with blue eyes and light skin and like yellow hair and I'm like who are these people And I'm like I I'm like I'm like what's going on here And then and then they they're talking to me and I don't understand them So I'm just like oh wow like what And and you know long story short uh they started calling me wet back go back to Mexico and yes a little guy because I mean my first ride on the bus uh I got on the head somebody got me on the head lock I was crying the whole way So I was crying the whole way It it was a disaster So I think that's why I hated school so much But uh eventually you know I learned English little by little and I I was very insecure and then I just grew

out of that insecurity and when I got out of high school and college I dropped out of college I tried it for like a year and I all I I just did college because they gave me something called grants So they used to give me uh financial assistance because I was I was low income and grants But the cool thing is that the grants you don't have to pay them back the grants As long as you take the classes they give you like a check for like two grand and you could do whatever you want with that check It's for school So I said well if I'm gonna go to school I need to look good So I need to go shop I went to Nordstrom Blooming bought some nice clothes and I was there in school and I learned how to drink and I learned how to how to how to connect with women and and and and that that was like that's what I learned college and and I'm very thankful for college for that because I I love women and I love good clothes And and then I dropped out after that was over And then I said well I don't like this I'm not gonna become rich because I always wanted to be a millionaire So I said you know that sorry to interrupt you I a really young dude because I feel like we know as little people we know what we kind of want to do We kind of have a sense of the overall goal At six Did you want to be a mega millionaire Yes because at six I started working and that's why our our daughter Italia she's six and she works Now we have the video I think if we can play it We have the video from your Instagram of you interviewing her She did a 40 minute podcast Yeah I love that so much Um I think Andy's gonna pull this up in a second Italia is she's six years old Um Absolutely adorable Um And it's so cute watching you talk to her Um Kyle wants to be a it wants to be a father of three girls and I will call you for sure I'm not sure if I want three girls I have a feeling I'm gonna have three girls Got it got it got it Well girls are the most loving So so like the the the boys they they're born and they love dad You're a role model but then the girl takes them away from you and you never see them again Now now they spend their time with the girlfriend's family A girl they take the they they take they take everybody to you So so like girls bully guys So the if you have daughters she's gonna get the boy and they're gonna grow up right Get married everything you're gonna have granddaughters grandsons whatever And she's gonna pull them to you and then the the the boy's family is gonna have some issues because they're not gonna see the family a lot So that's that that's that's what I see happening Daughters are always attached to the the mom and dad my brother is 100% like I I have my own family I'm doing my own thing And me on the other hand I'm like my mom my dad I'm all about like I'm all about bringing like the boyfriend and my mom and dad And yeah

so um that we had a guest on who said they believe that the father chooses the sex of the baby Did you want girls I wanted a boy because I always wanted to have uh like somebody that's gonna be myself but like a junior like me and and carry the torch But then when I had my first girl uh I got I fell in love with her because because the my first day I was depressed when when they told me the first day the 1st 24 hours they told me it's a girl I was like what the and because I was already thinking I was sure I was like 100% sure it's gonna be a boy And I was very depressed I almost died in the 1st 24 hours And then after that I got over it and then I fell in love with my girl And then and now I just want girls I don't want boys So this is um I don't know if you can see it we can pull it back up Uh There she is Little Italia with dad uh talking about uh healthy food and she's she's absolutely adorable Um And I love the name and um uh the name is because of the cars right Because of the cars and and just just so you know to answer your question about about six when I was six my dad is uh he was a painter So my dad was a painter all his life When he crossed the border he didn't have any paper So he needed to find a job So he became a painter super ethical guy I learned hard work ethical good core values from my dad And my mom and my mom used to be a teacher assistant in a Union Avenue Elementary School in in Park or in in in L A And then my dad was a painter So my dad would leave the house I would wake up and my dad would be gone Most of the time Right And and then when eventually when I started school we would wake up together and I would go to school He would go to work But my dad um he would always wake up early I would I wouldn't see him I would just see him in the night He would get home and he was exhausted tired and and from work from painting all day in the sun climbing ladders and things like that So we would come with a white like shirt like this but uh but not but white white shirt white outfit all painted like with with the marks And I would think that he was like a super hero and and fighting bad people I was a kid But then eventually I told him take me with you he took me with him and then I went to paint Holmes and that's the first time I saw Mansions in Beverly Hills in Bel Air and I saw a red Ferrari and that's when I told my dad you should have that car You should have this house How come we don't have a dad Like what's up with you And you know we're we're poor So my dad said it's not for us And that changed my life because I questioned him and I asked him why not And he said well if you work really hard and you never quit then maybe you'll be able to achieve that And I told my dad I am gonna achieve that And you were six when you said that I am I really believe it

when when we are I think it's around 6 to 7 We have we're still in that phase of like we haven't been luckily jaded because even if there have been traumatizing events because a lot of people have those in those formative years But I think at six we just really innately know where we're going and what we're destined to do And and I think um you know the drive in you is really incredible because uh I mean even the events it's called driven it makes perfect sense like it just sounds like once you saw that once you saw that experience you just didn't stop and and having your dad it sounds like a Hollywood movie in my in my brain Um Most of the events this is this is driven Um And uh for those that are watching that are meeting you for the very first time can you tell us a little bit about the event I know about it But for those that are watching that um want to attend or want to know more What what can we say Well driven is uh a place where people can come and learn business learn like my basic four principles that have helped me start seven businesses from scratch have been sales obviously because without sales you don't have a business and then marketing because if nobody knows you nobody pays you and and then and then uh systems and processes because if you never create systems and processes the business is never going to be worth anything because it's gonna rely on you And then training because the only way to take a company from 100 million to a billion is by training green people Because if you focus only on talent right now they're gonna have old habits they're going to be they're gonna be you know towards the end of their career they don't they don't like change they're outdated But if you want to scale a company from 100 million to a billion you need to get a bunch of green people that are straight out of high school college and train them how to become the elite loan officers or real estate or sales people in general So I believe in those four things and that's how we've been growing every company and four companies right now that we have they're all they're multi million dollar companies and and and I'm and I already have an exit plan for all of them but two of them are coming first and that's what we teach and driven We teach them how to start a business because there's no point of starting a mom and pop shop If you're just gonna keep a mom and pop shop you just created a job for yourself and you're gonna make less money you're gonna have more headaches more stress So there's no point of doing that And and that's what I like to teach people And I'm very uh I have a a very special place in my heart for my Latino community because obviously I'm Latino and I know how hard it is for us and everybody counts us out and and it's and you can achieve anything anybody any color any any any race any

part of the world you can be somebody big and great As long as you put up put the work and listen to the right information because today there's so many people giving you information but I believe that you need to watch the source of your advice and that's why we created this event It's already going on seven years So this is gonna be driven 7 2017 This is so exciting What I love about this and and learning about you is uh I'm like you in in a different sense Uh I was never given uh I always wanted a talk show ever since I was seven years old I would sit in my parents' basement and I would say welcome to the Michelle show I had no idea it was gonna be Michelle and Kyle obviously fast forward a few years Um But uh I think you know I came out here for acting and and hosting and things weren't happening for me And in 2019 I went back to school learn all the ins and outs of acting producing and writing And then I would get these like little moments of like oh I got an agent meeting or I got this or I got that And then in 2019 it wasn't moving fast enough In 2019 I was like I've had enough I I'm gonna create my own thing I just didn't know how or what Um And I created the show called The Charlotte Chronicles which is based off of my talk but that opened up a whole new world for me So I love your story of you wanted to be you want to speak and you wanted to talk but you created your own stage and your own platform Like it was I mean I watched I watched so many interviews and so many things about you but for the people that are watching like what what happened why did why did you create your own What was it for you Because you can't rely on anybody else Uh I can't stand people that always say oh it's because of that person or it's because of this person Uh It's because of my boss It's because of this whatever It's always because of you So you always have the last word and you control what you do You can't control what other people do but you can control what you do So I always wanted to speak on grand card on stage the 10 conference And I never got the opportunity before that I wanted to speak on Todd Duncan stage and that's a mortgage seminar I never got the opportunity I got tired of waiting and I just said you know what I'm gonna I'm gonna create my own stage I created my own stage and I didn't have the money I just I it was gonna be 50 K to start because I needed 25,000 for the deposit for the Ritz Carlton And I need another \$25,000 to pay a grant because he was gonna be my keynote speaker and I was gonna use Grant to take his audience So if you want to start an event and you want to fill it up pay somebody with an audience and they're gonna sell the tickets for you So IIII I knew because I I study a lot I have I've always been big on books mentors at one point I read a book a

week and and I knew that So I said I'm gonna get grant and I'm gonna sell tickets I'm gonna use his name and and I did that and I went to my one of my best friends at the time Uh He used to work for the company and I asked and I asked him hey buddy can you go 50 50 with me You'll be 50% owner of Driven and and Driven Made \$10 million last time And he could have been 50% owner He said he said no you know what um you you're you're not you're you're not a speaker It's risky And I said ok fine So I put 25 K of my money I didn't have much money That was probably all everything I had And I used a credit card to put the other 25 K And then I and then my wife is like well how are you gonna sell tickets What what's gonna happen We don't we don't have we don't have many employees maybe like one or two or or three or four or something like that And and and two of those were just people that were working on the website and they they weren't sales people So it was just me and I'm like how am I gonna sell tickets So I tell my team well I'm just gonna I'm gonna sell tickets and that's how we're gonna fund the event That's because the event cost it around 300,000 We only had 25 K and we use 25 K on the credit card So after 48 hours we have no ticket sales and I'm with we went to bar and in in uh on and we're sitting down there and I'm like ok let's let's let's eat and and I'm like man this is a failure another failure because I failed many times All my life and and I'm like and then I see my phone I get an email and it says new order uh \$2000 super VIP ticket Somebody somebody bought a VIP a super VIP ticket for two grand So I'm like now I'm \$2000 less in in the in the hole And then from there on we just yeah we we just sold more tickets because I believe when you do one thing you could do it again over and over and over again So I ran I ran with it and that's how it started So we got to get in the nitty gritty But I'm sorry I can't I have to interrupt you because we want to get Sylvia on his wife who is very much part of this Amazing amazing amazing Uh And uh yeah we can ask all those questions I'm sorry go that I know you have so many questions to leave at one We're good We're good OK OK I got Andy looking at me like so here is our Jackie and box it You wanna get it charged up You use this fantastic charger over here This is the output over there and it has an extra cable like this with the ability to charge it in your car So that is really cool So we have it all charged up It has here you can press on the display you can see now that it is not drawing any power it is not bringing in any power and it is 99% charged which is cool So as you want to use all your separate things you can turn on the little lights and it will show you as you can see there that now you can draw power out of them or you can turn them off just like you would

at home if you do if you wanna leave something plugged in but not having a draw power there you can turn it off So let's have some fun and see what our Jay can fire up So in the past we have used the Jari to light up our lives with go We have charged our cell phones and we have done a few other things but oh we've even lit up the Arrow Garden How amazing is that that we were able to light up the Arrow Garden But today we're gonna push the Jari to the limit and uh we are gonna take a look at the this works What's this This works That car vacuum Awesome Very cool And we could even take a look at Tabi used it And uh how amazing is this Oh my goodness You can just keep on going and going and going You can get into every little look and cranny in your car with all of this How awesome So this is what we're gonna do We're gonna stick it into our query Let's do it this way so you guys can see what I'm doing Turn it on It's a little light and the display have gone on because we are about to fire this up Thank you Mr Jay There we go That is cool So let's see what else we can fire up today I mean that you can I mean that is just so cool You see the today it's Wednesday April 26th 2023 We're so have you in the studio with me and the Kyle True Blood We have Albert Pros and it's important couples when they get on there Yes we we do We're not a couple but we are a couple We feel like we're like work spouses we're work spouses Um but I I heard about I met you yesterday Um and I instantly was like I love her outfit I'm very attracted to like what how you were and like you watching Albert and and I I when I was listening to your story you give so much credit to her about like you know even the name and like where you like how how far you've come and I just wanna know like what is it like to work with each other And and and I I know at one point there was like a circulation of five women and you became the one Yeah So first of all thank you for having us and yeah it was so nice to meet you We're really excited to be here and how it is to work with Albert Well it's challenging at times you know and working with your spouse is definitely not always easy but him and I you know we're a team and we remind each other of that when things get a little tense or we might have disagreements and we're ok agreeing to disagree at times Right But women were a little more into you know we rely on our intuition And for me personally I'm I love I like solid foundations and I like to know how right So when he tells me so we're gonna do Xy and Z I'm like shit OK let me like show me what it looks like what we're doing and give me an example and then I can put it together basically as what I do you know and I think what's helped us a lot is that we're very much we're like best friends like we're really crazy together very compatible And I always

like to say that he's a version of me if I was a guy and like we're very much the same It's where he's a little crazier than I am as far as risk taking goals you know and that's why we always say that he has gaps and I have gaps but together we literally have none which is really cool you know and we compliment each other and we just understand business after been together for so long you know and I got into the industry because of him So Wow Wow Yeah that is challenging huh When you have when you're different but the same uh you're learning from each other in certain ways Um so how how does that come to be with like you said you both come across as very intense and and and go getter attitudes right And when you're the same it seems that you would butt heads but it doesn't seem like it seems to be very uh very how do I say Well we we we grew together like I don't um I'm very I'm very aware of what I'm great at and what I'm bad at and and I don't focus on things that I'm not great at So I just focus on things that I'm great at like sometimes uh still she'll try to give me advice on social media and she's like and she's like hey you shouldn't you shouldn't put that word You shouldn't say that that that wasn't a good post don't post that And you know like it's pretty obvious that she's not good in social media and I'm I'm amazing on it and and uh like you could see with the insights you could see like millions of people see my page and only like 20 1000 people see her her page and and so so I know how to run the social media So I tell her how to do that and and and I I just don't let it get to me but when it comes for example to the company uh dealing dealing with employees for example uh operation systems uh she's the one So I stay out of it because whenever I try to organize plan something I create disasters So obviously that was a process in learning what each other's strengths were and allowing each other to be strong in your own way Can we talk about that a little bit Well I think that personally if I can you know say something I think what it is is that we've learned how to trust each other you know and it's like I know he's got certain things under control and I have certain things under control right And as you grow together see I was always that person you know my first book I ever bought at a library with a gift card or at a bookstore was uh business for Dummies right So I've always wanted to be better and and make money and I always wanted to be rich since I was little as well You know we have very similar backgrounds You know I was actually born in Mexico He was born here and probably he's been to Mexico more than I have But I grew up here I went to school here I did everything here basically So for me I'm like I'm I feel super American I'm proud to be Mexican and like he said we wanna help

our Mexican people But I would always go with him to events like if he would be like hey let's go do this I'd be like ok let's do it Like I'm always up for anything you know and especially if it includes learning because for me I've always loved quotes and things to keep me inspired you know growing up super poor like him you know I think we're just very similar very compatible and more than anything it's really the trust because I trust him with my life with my kids' life with the company like with everything I know he's got our back Does that make sense And what he's great at I suck at he's very much super driven Like I've never met anybody like him Like if he has 100 grand he'll spend two If I have 100 I'm going to spend 50 Yeah it's true He's a risk taker and he kind of does it before He has the plan I like to call it the Kyle plan As I go we'll call it the Kyle plan when they were making another big I'm gonna be like this is the Kyle Oh man I got trademarked by a millionaire Look at that No I I think it's really it's inspiring overall Thank you to see the you know the you know the old tale goes is that like two a couple can't be successful together Like House of Cards They're going to split Right But it seems just super strong You guys grew together It's you guys are very also about each other's weaknesses and strengths I think it's also very important You can talk about it I don't see anyone kind of grit their teeth on the other side of the chair Like well she'll she'll like I'll call her fat and she'll call me fat too because because I believe you're fat Yeah Yeah Yeah You're gonna do stairs No No Yeah you're you're fat you're fat I I do I do say that and it's because I believe that when when you find somebody and you fall in love with them right You fall in love with them How you how you meet them right So you should never regress you should always get better You should always look for progress So I believe that when you get married you out of respect for your significant other spouse you should always improve every day Even if it's 1% every day improve 1% So your wife your husband you should look better than when you met Not worse So I don't tolerate that I wouldn't be married with her if she let go of herself and neither would she if I let go of myself I I would hope so So I I just believe in that and I and it's it's disrespectful to your uh your your other partner because you should get better and not get worse Hold each other accountable That's really and we're also best friends So I think that's very important So like we we talk we talk to each other like best friends Yeah It's disrespectful If somebody's getting fat and you notice it disrespectful It's unethical for you not to say anything You're supposed to be the ethical thing would be hey you're getting fat stop eating That's true love I truly believe that myself You should be able

to tell and have those hard conversations but those real conversations and hold each other accountable And at the end of the day I feel like that's a positive because you're in essence helping that person get better not tearing them down I want to go back to the moment where you saw the VIP ticket come in What was it like for the two of you Was it like this like ecstatic moment of like oh my God Yeah it was one of the happiest moments of my life because because it's like when you get into real estate or mortgage you you some people are doing that for a year and they can get a deal and when you get your first deal and you close your first deal and you make your 1st 10 \$15,000 maybe more in commission you're like wow if I did it one time I can do it again And that's the only hope you need for you to move forward and kill it So when I got that ticket and then it was the most expensive ticket \$2000 I realized damn I could sell a \$2000 ticket right So all I gotta do is repeat repeat the process and I'm gonna get more \$2000 tickets and I did it and we did it over and over again We sold like I don't know like 100 or 100 and 50 something like that super VIP tickets for that event And and it's because when you find the way to do it just repeat it That's why you gotta copy what works I copied what Cardona was doing and it worked and to get to that space to get to that where we were like oh this works There's a lot of risk a lot of failure And you said that you were like I failed many times I caught that earlier And the resilience of that Did you guys know each other at this point when you were failing a lot I mean II I was I was an entrepreneur since I was six So I used to buy that's II I used to open all these businesses So for example when I was in in elementary school I use I bought a a CD RW drive which is the to burn CD Si I was selling C DS Yeah I and like I was I was 678 but uh I was a little kid like like between 667 and I would copy uh games and C DS and and I would burn them teachers Yeah I would have a deal that it's 10 \$10 a CD \$10 a CD Or if you buy like a 10 a 10 a package of 10 I'll give it to you for 60 bucks So so I used to collect I used to come home sometimes with 60 bucks 100 and 20 bucks 200 bucks Parents ask you like what are you doing I mean they probably thought I was selling drugs and and and uh but but they knew that I was doing that because my dad bought me my CD RW drive So I was very happy about the CD RW drive and then also uh I started uh buying uh Jordan's and and and I used to flip them so I used to go with my dad at 5 a.m. when I was a little kid 67 years old to get Jordan's and then we would flip him Same thing as real estate Right Yeah Yeah you were doing you were basically practicing for what you're doing now Yeah So those businesses did pretty good But but uh

the flipping Jordans was legit but selling C DS uh was kind of like not the most ethical thing but you know uh I think uh the statue uh or the law that they have it already Yeah it it already passed So I think I'm pretty safe Ok so so so so please just let me um focus on what I'm doing right now So so after that though I started other businesses online and e-commerce and and I and II I wired money and I lost it My dad gave me like eight grand I wired it and I lost eight grand and and so I failed I made a lot of mistakes but I learned and I think all of that the combination of me having to struggle being the first child and having to figure out everything on my own and having nobody to back me up But my parents forced me to become someone that that uh force force me to to get the best out of me to bring the best out of me And and that's how I think I started really supportive super super nice people You were such a good relationship and I feel like that So yeah we we're very close Me and my dad are like like Kobe and Phil Jackson So like we don't we don't talk a lot but like it's almost like he he gives me the look and then I give him the look back and we're like is your is your so your dad must be so proud and and your parents must be so proud of both of you for doing like incredible things And not only are you doing incredible things you becoming wealthy on your own But like you're also not only and I said this to my best friend the other day it's also what you're putting out into the world It's not like you're you're you're you're changing people's lives you're showing them that they too can do these incredible things And that is so so valuable and goes above and beyond any job Really You you you are teachers you said your mom is a teacher She was a teacher assistant for for school elementary school I think that's really cool And I think um I mean so I was listening to the interview yesterday with Marissa and um was it Grant Cardone book that you picked up in 2008 that in you And then were you starting to see people around you where you were just like I want to do that Like you're so again driven It just seems like I've seen so many people with this hat driven I before I didn't know what it was I make apologies because I'm I'm not in that world but like I actually know someone um that I'm working with He came um uh Bruce do you know about Bruce Cardin Yeah he wears a driven hat every day He comes in here and driven and I was like I was one day I was like what is that It's called brand awareness It's it's uh like when you have a brand uh one the advice that I would give everybody here if you want to become a millionaire quicker then you gotta create your personal brand and brand awareness So if if your brand is X make sure that you create T shirts hats uh you promote it you put it on social media and give them away for

free because you're gonna get known If you wanna get if you wanna make more money get more known People don't buy from from the best People don't buy from the most experienced people buy from who they know So for us like we have everything in life that we want or more like in two weeks we're gonna be in Maui we're gonna fly in a G 5 50 Gulf stream We're gonna go with one of our best friends Our kids are flying and jumping up and down They don't wear their seat belts in the jet and and we get there we're safe we got security we live in Bel Air like it it it's we can't we can't ask for anything So I said it yesterday What I wanna do is I wanna be the next Abraham Lincoln George Washington Martin Luther King Jr because once like like when you die even if you're a billionaire what happens when you die They remember you for one year They remember you a little bit for the second year 34 years they barely remember you After five years nobody cares or remembers you anymore So in order for for you to last in this world you got to be some you gotta something big creating legacy that way You're one of those three guys that I mentioned Martin Luther King George Washington Abraham Lincoln So when my daughter is 80 I wanted people to tell her hey your dad your papa was the great Albert Huh Yeah we remember that guy So that's what we're doing right now So the only way to get that is to reach more people to be on more podcasts to be out there increase your audience and help people because if you help a billion people you're gonna make a trillion I I so I still wanna create a show around youtube Um I think it's incredible and and and inspiring and so awesome And I this last question before we go I hate hearing that sound by the way because that means that our time is up But what is it like looking at your kids knowing that you came from Not very much and seeing them like look at like having this experience of being in a private check like family or and that's the challenging part because as parents we want overprotect and our our Children right However we have to we can enable them and that's what we're working on Like Italia She'll be like let's go to target to buy kids for toys for the kids that don't have any all but one for her and one for and one for her you know we're working she is a she says buy me more toys because we tell her you have all the toys already She says well let's go give them more new toys and then all my other toys we'll give it away to the to the poor kids So that's the challenging part because we wanna show them that it takes work to get here and we do that through you know like we create these charges She earns stickers Yeah she goes to the office and and they love it you know because our kids are home schooled So it's just it's being a parent is definitely the most biggest blessing However we

don't wanna make mistakes as parents but there really isn't a blue book to tell us And also 11 important thing also we gotta keep working hard and harder and harder and smarter as we grow Like I wanna work as hard as I can until I die Because it's unfair for my my my uh young youngest daughter or son to see a lazy dad to see a a retired dad that's on the couch Like because my first child saw me hard working and and getting us out of trouble and figure things out and and almost going almost losing it all and seeing me like not quit and and keep going I I want my my smallest ones to also see that hard working dad because I don't want him to grow up up and think like oh no life is easy and you don't have to work hard So I want I want to be a good example for the youngest just like I was to the oldest Right Right And that we do every day you know we teach them things You know if she says like I can't do something I'm like tell her how could you So now she tells her little sister no how could you do it It's really cute So um these are your cameras over here pluck away how people can can find you if they don't already know you which it would be insane if they didn't but let people know where they can reach you and you could just Google Albert Precio just Google Al Preciado and you follow me on Instagram Al Al Precio but just go Instagram because I'm horrible with social media if they if you guys Google Albert Precio wife Yeah Thank you so much for being on our show I was going to say on your show it out there to the universe Thank you for it's been an awesome day here at live Make sure you have a drink and then that is incredible I love watching on youtube We have a show called Driven Couple A chance me and now with great scarce and the
