

GDL Feb 2, 2023

Maybe I was wearing the diaper but she was in the onesie potato So with the tomato tomato and she's looking at me and she wants to know if I'm social media or any of that And I'm just completely alec about that and I don't move because I'm appalled that someone's is rude and then she physically shoves me out of the way Now you turn on turn on there was something on so was not looking for her And about 27 minutes later I see a drunken mess hobbling around mascara in a onesie and I walk up to her and I kind of grab her arm and now you guys are wrestling Yeah and she's with all of her friends and they actually thought it was gonna come to fuss and we got this huge thing and I'm not gonna go into the details of what happened because that may be offensive to certain people watching this So don't worry we can do that That's the goal on the details of what happened the details So she wanted to know if I was on social media doing any of that Um And I let her know that No that's for seven year old Japanese girls or Asians whatever it was It'll be a little more whatever Have you Exactly Um and then it proceeded to get into this escalated fight for 43 minutes straight 43 minutes I've got a weird thing for numbers autism Asperger's a DH do CD check the time then get to the argument check the time of the check all the boxes And so for 43 minutes straight we're in this massive fight her friends think we're gonna throw down for her And I it's um we're flirting so cute And so um of course I find out from single and so it's time for my friend and I to leave and you're single and she looks at me that surprises you Um and I know is it ok for me to get your business And she looks at me and lets me know you to ring me on tomorrow Yeah Yeah Yeah So we have pictures of you Look how cute this is You guys are so cute Ok Keep going So she um so that day was it And you can kind of track our movements then up at Bu Wines which is up Mulholland on that side then down in the valley for some months No no no My friend and I and this is just the path we did and then we end up in Hollywood and then downtown and then back home I end up losing everything that day But my phone and her business card that's all I had So 601 in the morning I give her a ring because I'm not a patient person And uh we went on a date that it is tomorrow and one of them must follow through on their promise tomorrow again After this interview There's plenty and Andy's gonna touch up my the things that I do when I send to my friends it's my own personal vernacular You'll appreciate it It's kinetically broken down by multiple languages at the same time Parentally how many a lot About 67

20 infinitely increasing always expands Um So um meet her at this restaurant and I meet her outside and she's a very independent strong woman She don't want me to pick her up Um and I bring all these flow I mean this massive bouquet of flowers Now typically when I was on dates I would I have to let people know that I am not normal Something's not right in the head And if you want to take me on then you've got to have the issues of your own And so my typical first date and I would meet somebody I'd bring them you know logically um lax cook sausages Um every everyone everyone Yeah That's awesome Yeah it's and there were a few Muslims that were thrown in there just for an important reason like AJ IC you know I don't wanna be I don't want to be you know that guy who does the same thing every time So the the its always changed a little bit which strikes my fans Oh and always summer's eve summer's Eve eve I'm a big I'm a big I love gift But I mean it's fun It's fun It's different and it's risky but it's fun It's different I like that I like that Yes Yes Yes But it's fun We went there He said summer's eve Is is that like is that another one of your zests tastes Well one must have an expanding palette if you if you're not open to trying a couple things on all levels and summer's eve throw it in the pallet Yes absolutely But the one I was gonna ask if there's like a specific flavor We like bubble bubble Ok So you brought her you brought her gifts So I bring this massive boca flowers and I don't believe in the cliché roses and all that I always get very exotic flowers and inadvertently I got her one of her favorite flowers What Um I didn't know I did this massive and the thing was bigger than she was the first by the way let them know it's your birthday inside We sit down and the flowers get their own table They're that big Oh that's so cute And so who it was um walk into the car Um um from that date we were together for 100 and 43 days straight and then she went to Thailand she invited me I couldn't do it that little silly thing Work Yeah Yeah Yeah Clarified his love at first bitch slap Name of a book What's the name of the book The new one Let's make it into a movie I want to make it into a movie in the right place So um yes or she came back two days early from the trip to vote and so cute And that just and we we're in a blue state So it's not as if it that made me that made me so proud of her And so I took her to vote at a place around the corner That's cute And um yeah she she has a a special and by the way my wife is impossibly beautiful She read this by the pictures she let see this wedding photo that we'll get to in a minute Yeah she's brilliant She's a um where's that venue Where are you guys That is the uh roar Chalk Caves in Res I was gonna say it doesn't seem like a like an establishment You know this is you know the champagne Yeah

OK We were the first wedding in 3000 to build the Roman Empire Wow that's her Coming down the steps That's amazing hole in all of Europe where we got married which is 76 ft in front of it is the second deepest hole right where we're standing That's incredible And then that and that's our stepfather by the way who learned Hebrew to to officiate our wedding That's amazing That's awesome And so we had this spectacular again first wedding in 3000 years Amazing Um And then the whole night was spectacular And as if that wasn't enough we had an L A wedding What how is it even That's a we had I think we invited about 200 people to that one This one was about 62 6 because I made it impossible to get there to pay for it the day before Bastille Day and men were all staying there and the tour de France started there And so we have a picture of my wife on a light pole the day before and she's taking pictures with them So it was a surreal wonderful experience But eventually and I look up it was a destination So we set up Yeah But so they made up we crashed the L A wedding Ok Cool So like it's kind of fantastic and pictures will be there too All of our friends They are very good people But the it's all in the background from the photographer Um Yeah So those were the two weddings Yeah Um I count the second one because I tricked her into the Beverly Hills like I just shamed her into it and then we got her license there Amazing Uh ex of mine's mother um who was not so normal in the head came up Oh my God You know the police This is my my wife You have to move the middle of something right now That is comedy goal goal Who came up with this idea for the um she did it I mean we did but she did That's great Yeah it was beyond spectacular I mean you guys look so cute and so happy When was this Five or six That's the one thing I'm bad with dude But years that's that's the problem I have because I just don't it's not relevant in my world I was gonna say you're not finding it relevance or a reference point Politics One Well so that was that was the intention I was groomed to be a politician And then my education I went to the school that turns out all the world leaders um or have my own late night variety show Yeah Right here we'll have to do uh we'll have to do a weekly uh night show We did it we actually did a night show the other day which was fun It was good Night Live It was a little more risky It was riskier It was a risk It was a risque It was uh not really I mean kind of Yeah Yeah Yeah we were playing we were playing the Best Friends game Well she's from uh rings Luckily not in the same divisions That was a that was Christmas Day which was spectacular because the teams were out of the playoffs And so meeting your viewers Jews love We have eight nights where we get socks essentially Right

So don't be jealous right Um we have candles instead of lights and you have a plethora of music Jews love lights and holiday music It's our favorite thing So Christmas Day That was oh there you go Yeah So I was wearing as well just to match it Now do you have do you have a Hanukkah bush or do you do a Christmas tree Well she's my Hanukkah bush Honestly it wasn't as bad as I anticipated Could have been a little more vulgar but PG rating Um yeah So the thing is that's great is she went down to San Diego to see some friends and she had bought uh we I built her a home gym sitting in the living room and she came in and she had no idea that I can I have colitis Of course I mean with all the out is why wouldn't you And she comes in and she's just ripping me a new one Why didn't you You lazy blink blink blink You didn't do anything I put the box She and she's running around the house Patience is well underrated Yes And it was delicious I'm still oh it's fantastic Snowboarding skiing snow Oh yeah He's a snowboarder Yeah She was actually in the junior oss for uh track and field I was Olympian for track and field in there last week Where were we um the gym and and she's just in a kind of a rage and she didn't do this but it was one of the things where I thought she was gonna kick our pups She's just sitting here and she's home for about 40 years and then I let her know hey can you get me something from the office The 48 You want the numbers that I forget that be on the dot And um and distances But that's neither here nor there So devious patients I sitting on the angel's shoulder and I just was eating it as she opened it up because oh f me because I left the boxes I resealed the boxes left them all in the living room So she had she thought I they put TV S in the bike weights Yeah Yeah So she has these things when she comes with her trips and she comes back and she wants to get mad at me So one of them was and I don't believe in Christmas trees because I'm just lazy but she was gone and I thought a good surprise for her I'm gonna get her the largest Hanukkah bush I can possibly find So Yeah and I let them know what makes showed me a tree And so I bought it back and of course my neighbor across the street who's Jewish helps me carry it in Now Jews and manual labor It's kind of a comedy in of itself So I think we started so a part of a tree part of some foreskin and maybe a random limb trying to get this thing in there for part of it Uh Yeah So we're not even done yet Andy let me know we're supposed to be here for what 25 hours Nice I love I don't sleep So and I can enter So you lost your skin is the tree in floor ceiling 20 ft and it it doesn't even fit it's bending that's cool And so she comes in and again she's mad about something I can't and she misses the tree entirely and I'm just sitting in the

kitchen I'm waiting Ok this will be good And then I hear holy poopers So she had um she got her Hanukkah bush It was massive It was decorated with um you decorated it well yeah Jewish Jewish ornaments obviously Star Wars ornaments obviously uh store in that Uh The business is uh they they part adults oriented toys And so I thought what else would be good on a Christmas show So I had much of that stuff hanging as well for sure So we had friends who came over and you know they're looking at it Is that it And I let them know is that what I think it is Oh no It's it's batteries you can turn it on ornaments So you've got Star Wars you've got Christmas you've got Jewish Um I think I put something in there for Christmas and then we have hanging which could be a consolation prize to take home once a tree is done There you go crazy You can't So that was um that's those rages that she gets in the devious patience It's great It's great because rather than rubbing someone's face in it you just get to be smug more Please take us a little smirk Maybe a little look I can see why she married you um all the time So I inadvertently have a very random education as I pointed out to your passions My passion is war politics patriotism and music war politics music war politics politics um patriotism and music And the reason I I throw patriotism there is when I was about 15 I went to DC for some U CDC I just remember being struck by how people I was in the library of Congress I was in the Supreme Court and it just moved me so much that bureaucratic red tape but they still love the country so much and it's everywhere and it wasn't for any other intention just for them and they loved it And so that really just made me beyond giddy I ended up being congressional page and I work for who they were the Government Affairs committee They were huge congressmen tenured They'd be kind of up there with Adam Schiff right now if you're looking at where they were So they were they were fantastic And so a congressional page So houses of Congress And so that was fantastic And by the way where the pages live is an old mortuary What were you doing Working in both Oh because you can go back and forth between the Senate and the Congress because you're working 222 congressmen and then they had their kind of go back and forth corresponding underneath That's where I met John Glenn with my mom and my brother and my mom was like oh guys this is John Glenn We were super little and uh three moon three times and my brother was when he was like a little guy and then he you know ultimately went back um which I thought was uh I always attributed to my brother Andrew for being a little prick that he was going to go back to space But I thought that was so cool We would go to DC I mean he wanted to be an

astronaut but he was afraid of flying I just want to get back on top of means believing in our government believing in the constitution And so for instance um again I went to education so they understand what patriotism comes into this I went to the school first of all it's far the school from my family and the only reason I chose it was if I grew up in this city I'd always be so and so so ok when I was in high school and it was named after me for something I had done and when they introduced me they were named after me they let everyone know this is so and so's son and there was just something to get cracked in my buddy Yeah it was an old lady exorcism So I went home and I was looking at all the schools I got into and for this one geographically DC So the name of the school is the Elliott School of International Affairs It's a consortium of Georgetown George Washington and Johns Hopkins And then you do you have to be abroad So it's a long program It's a very elite program They take very few people How long was it It's supposed to be six years I believe we did it well because there were only six of us that basically finished out of 53 I think Yeah it's because you get burned out We've got three different campuses and then very intense and most of us had to go through which has burned people out as well So I mean when I was there I was interning at the World Bank and the IMF and that was horrible And I was brought up on ethnic charges for being ignorant of my heritage which is amusing because I was this account as an intern um \$25 million to the uh to Africa to the Ivory Coast They never did anything It was just sitting in a checking account of course not even aggregating anything And that was just mind boling to me All they want to know is who donated it not what we should do with it So I delivered the report to the guy who requested it and he comes at me in Spanish and I answer this way and again Spanish I answer this way and again Spanish answer this way and he wants no no I know it but I'm Jew and he looks at me No I'm Latino I know fellow Latinos Your complexion your hair you're Latino And I just OK cool Have a good one man and I walked out and I came back the next day and on my desk I was brought up on charges for being ignorant of my cultural heritage nonexistent cultural Oh it was spectacular I have it a frame somewhere back to the patriotism patriotism So the um it's all the uh international school So I've got um four double degrees in international politics international uh economics international politics Yeah because the university black University So uh double majors in uh no not at all Um uh International Affairs International uh economics or politics finished at the Sorbonne Um and CIA that kind of stuff And I realized that I could actually do more good because my dad was

so intent on me getting to the CIA because they recruited me left and right And then dad if I did that you'd get something that I was dead And I would never see my family again because I would not be here and you might still be alive I would be but they would never see me again And that would be the reason for me not pursuing that path But I decided at that point that I can do more good seen the bureaucratic red tape And I realized so I was given and this is humility Actually I I was born with a plethora of gifts that just keep um exponentially increasing Um And it's I was put here to do something to make the world a better place that much I know um how and where and when I do it whenever I can But it's these gifts that I have my ability to kind of move in any circle be anybody connect on every level because I do believe that there is that experience It's something you have to learn from but you do a takeaway and you learn what you don't want to do Um Did you always have this mind that my phone ever since you were a little guy from your parents or just like innately my grandparents Awesome What about your grandfather that had made you have this experience He died in 1995 just so you understand people still come up to me to this day letting you know how he changed their life Wow So he's been dead since 1995 And and and please let me know what your about your grandfather Because I don't know So he was the ultimate renaissance man um lawyer businessman uh real estate magnate Secret Colonel in the Hazarat which is the uh would have fishing trips and my mother would have his friends see his friends come at you know three in the morning to the house and he was sending guns to Israel And so he became an honorary colonel He was also an ambassador for you know a small stint to either Belgium or Luxembourg I mean there's not anything this man didn't do and he was beyond brilliant and the kindest soul you've ever met in your entire life But he's the toughest mother ever Usually they are the kinder they are the tougher a very good let me know after he wants to meet and be behind the school yard at 3 60 Yeah Yeah Big big heart tough outer outer shell Yeah So he was and he was also um an artist a sculptor and my grandmother was a spectacular artist whose pantheon of art expanded you know 50 60 years for 70 years Um It's either oh wow you get it from her Yeah o'clock in the afternoon So it was a different situation Um But we always knew and all my friends knew when we get home after um having a salubrious night of live we get on the phone and we drunk dial her and she'd be in her studio and she'd be painting blasting music and she was just so whimsical and brilliant By the way beyond brilliant Both were um and she saw the beauty and everything I got dispatched to um get my grandmother

Yeah Where are you And um I found her in the shower with a sketchbook and she she was sketching the veins of the travertine in the marble She's found fascinating in depth Um huge um beyond fascinating people Incredible incredible And so I so when I could I would fly back every two weeks to have dinner with my grandmother and then fly back out wherever I was Um Yeah and it was just one of these things and one of my going away parties it was at this uh place in Hollywood and I think my friends put together about 1500 people came to this thing and the star was my grandmother 16 layer mink fur coat That's always for color Yeah Yeah And my friends all fell in love with her Of course I mean it was how do you know And she's stunning Um We only have a couple of minutes with the show but I hope because we're so fascinated Um uh I I wanna pull you away I got what I got and and he gave me a two with his hands I'm not coming up with this I would I wouldn't be you know I wouldn't be doing tell people how they can connect with you and and find more and so fun right now Yeah Um Well that's I'm just getting go ahead You can find me I run a clinic down a free clinic down in uh and we actually do fights and then we also harvest their organs when they're done But you can reach me at uh I'll give you just this address It's hash underscore L as in V as in victorious at yahoo dot com Lose your attention And if you want I can give you my 100 number But since I know all those people so well I'll let you know that I'll waive the first four minutes 4 95 petrol So that's probably the best way to get on Got a you're hilarious Um your day if you want to find out your door or like you know a whorehouse make sure you contact him and for many other reasons So you been wonderful awesome news friends We'll see you guys got to make sure I'll see you then Bye Oh my God you're hilarious I can't stop laughing There's so much there's so much I do Well the thing is you bring back to patriotism All I am is and I would always circle back I thought you were going to that's why I was like I was trying to make sure too because we were time limited But yeah so all the points are they do have yeah I got the fingers and I was like oh decrease that a a love yeah Guess And he's an earth
