Good Day life Yeah with the great of scarce and this is in it's going to be the mission the you know attraction Good morning And I Yeah with great scarce and is in her going to be the mission It's Josh check But now too hey Miss Josh check it Time for the challenge No chicken Ok Just in style Do just that to know that you know So what right that chicken Mr Welcome to Good Day Live Today is February the 1st 2023 We're so happy You're in the studio with me Natasha And who's this guy How you doing I'm Kyle Trip We have a happy sunny day today in L A Yes we have a happy sunny day in LA I can't believe it's the first of February We also have some dogs We have studio place we got some dog This is Charlotte Can't live mine up She's pretty big Charlotte come was a whopping £5 She was adapted from dogs without boys She is a mini pincher and Chihuahua mix and she is the reason why me and Kyle are buddies about borders Shout out to Chloe Lawrence Lawrence We follow each other She posts all the time about dogs like every day there's a new dog without borders about dogs every single day He's so funny when you're like yes because you just like say like you know who it is and you say the first and last name it's just really fun That's just talk borders Yes of course Yes Uh let us know where you're tuning in from We got the chat We want to connect with you and see how your uh what's today Wednesday How your Wednesday is going How's yours going Happy Hump Day Pretty good Treating it just like a Wednesday Wednesday You're dialed in right You're not like you're not like sore or lack of days ago from the weekend You're not hoping for the other weekend You're like right in the middle You're just focused You zeroed in good I'm good So where are you at I just told you I know that I said that's where you're at I didn't say look up there What are you looking at I was looking at you I was looking at you Um today is the first day of Black History Month Yeah Talk to me about Black History Month Ok Why is it February of all the months Why is it February Why am I asking you I don't know I feel like you should know Do you do you know what does anyone know What do you want to Google it my friend said it's the shortest month a year that we you know nominate this to be Black History Month But it should be you know when did this start When did Black History Month start Do we know do our producers know when Black History Month There we go OK What do we got Uh OK This is why apparently it's because Abraham Lincoln's birthday and so was Frederick Douglass's birthday We were both in February and because of the Frederick

Douglass was born enslaved and obviously Lincoln had to do with the emancipation Uh I guess that's why it's in February Uh OK Pretty cool Uh OK OK OK And it became Black History Month in 1976 Um A tradition that started in the Jim Crow era was officially recognized at in 1976 Cool OK OK Do I think we should uh moving forward every day that we're live we should we should talk about um somebody who was a major influence in black culture that made a difference because the pressure is on for my research Your pressure is on 28 people I got to find out about it We're not on every day That's true That's true You know shout out to the black culture They've been you know we're we're doing our thing out there Um Despite our you know everyone has boundary everyone has setbacks everyone has you know obstacles to overcome and uh just proud of America in general not just like one race We're all we're all we're all doing it together Um But it's Black History Month is Black History Month We should honor that You know I so that I'm the one that's saying this No no no no I love it Um because I feel like in 2023 you have to say that and I have to say what I just said oh I could see that I could see that I I Yeah I listen A lot of my friends are um black Can I say that Can I say that you you have more friends that are white than I do I do you have more black friends than I do Listen What is that It's interesting like sometimes people are like oh that black guy like oh can I say black It's like I mean can you though let's get into it let's get into it Can you we have homeless people screaming that they're white on the on the street We can't mention that people are black and if you're not getting any of those insight jokes make sure you hit that follow button and follow us on Instagram on Good underscore Day Live and tiktok on Good underscore Day Live or also on youtube if you want to watch us um and see some of the behind the scenes over there We we are pretty funny I'd like to say that Yeah Yeah Yeah Yeah So yeah We were just I was just asking like is it appropriate to say uh that black guy I would never say that Why not Because I don't wanna i someone because of the way they look Here's my thing That's never been my thing Out of 100 people are like that white guy over there is um looking at you Oh Yeah You know what I mean And if he's black like what's the problem There's no we gotta take the stigma that he's black I'm just we just got to take the stigma out of black But it's interesting because I feel like uh the culture perpetuated themselves They're like I'm not black and brown or don't say the N word or we can only say there's just a lot of sensitivity and taboo words in our culture I just we are like the prominent culture where it comes to taboo words And I find that very interesting I just not not not

wrong or right I just find it really interesting We're like no I just thought it was interesting that like you could find a ton of rap songs where they use the N word but it's like don't say it but we'll say it You don't say it we'll say it and it's like listen to each his own to each to each to each his own I listen I I uh my one of my best friends uh was in a conversation with um I forget who the rapper was But she brought up the conversation of like why use the N word Um What is the point of it And she herself is black And so it was just a really interesting conversation about uh he was just saying like it's in it's something that they do and they've done he said however he wants to turn a new leaf use it so much it like and and it still bothers me till this day We're really getting into it on February 1st We want to connect with you and see how your website is going first Let's talk about the N word Let's talk about the N word Let's talk about Tom Brady You know officially Did you No tell me about it was it was gracious Did he give a shout out to he Why would he he did Thank her like my wife my family for the support for sure They're divorced right now They're divorced I'm pretty sure he's dating somebody else Wait wait wait wait wait wait hold on I have to say this If the mother of your Children was supporting you she wasn't she divorced him because he went back That's not why she divorced him the camp One of the main reasons is what I heard It's what I read Is that true Giselle and Tom broke up because of Tom and football They divorced Yeah they divorced at the beginning of the season When he like he decided he was coming back a week later they got divorced It was pretty self explanatory I mean let let's uh let's pull this up So he says I'm retiring for good Thank you guys for allowing me to live my absolute dream I wouldn't change a thing He shouldn't change a thing The best football player that's ever lived Nobody's saying he should change a thing I'm just saying like I think he gave a special shout out from what I read to Giselle too Good And I think you know listen I think yes I think when people break up there's still love and appreciation there unless it goes down in flames Right Rarely when you have kids Right I I got my hope is that I never get divorced ever But I don't know what I don't know what that again I I've never been married I've never been engaged I've never done any of it He was gracious He was like is marriage even a thing anymore I mean I have one I have one friend He's been he's in like a 20 you know he's he's in a 13 year relationship They have a kid together They've never separated never broken up never even taken a break or in 13 years they have a house and a kid together They're not getting married They they like party celebration bill but they were like they were like what is marriage like

Like it's institutionalized I don't want it I kinda want the paper Maybe I'll just like write up a fake one Like I'll just like it's kind of like the N word everyone's doing it So I'll bring it back to that Yes I do I do that I want the dress I want the party I want the all of it What are you looking at I mean like that works You're like that's adorable No I do I do want that too That there is a discernment between I don't know if I can do it every day every day Seems like a lot every day with that with that person I can do every day on a talk show with you So that's just it's only an hour and a half You know what I mean Well how long will people actually spend together That's the real question I think it dwindles the longer you stay together You know like it starts off super hot 12 hours a day What are you doing I miss you I miss you I just saw you I miss you and then like two years later it's just like what do you want Two years You're right there Wait two years there you are you already Which is hilarious When I asked you I was like Kyle can you grab me the our generation Two years Three years max changes Yeah Yeah We we we're instant gratification generation We're instant gratification We're the click click click Yeah Listen I I mean I'm I'm what did uh Dre say Medicinal I'm old fashioned and and and modern So I'm traditional and and modern Uh I I don't know like I just wanna say the word You just wanted to say the word Yeah I'm what I am I you know II I think just because of the way I listen things have changed I think a lot has changed Like uh my I grew up with my mom my dad like my mom is very traditional and she took she like took care of us but she also was a clinical psychologist but she worked out of the house She also said but like she said she could have left my dad like a couple of times and I was like why are you telling me this I mean every couple has that like I could have left you remember that when you came home drunk My mom my mom when she was six she was like you know I could have let your father like a million times would have stuck stuck around for you guys I was like why are you telling me this for But you know I guess that's true What are you doing over there You texting something more important You bored No no no no no OK What are you looking up You're looking up statistics I knew it Look at this It's not telling me not telling you what the statistics are for married people in 2023 because it's it's only been a month Look up 2022 anything Hm I don't know I yes I want the party I want the dress I saw this amazing Alexander mcqueen dress the other day when I was on Rodeo Drive which my buddy who's not my buddy but Maria Monos was wearing um for Anastasia's 25th anniversary for uh doing brows Uh all those that were in attendants were big people like Oprah Winfrey Oprah A Alessandra

Alessandra Ambrosio Ambrosia I can't even say her last name Um the Victoria Secret Model Um what are you doing 1964 is when they we're not saying to people uh white only fountains black people go jerk out of the hose 1964 I thought you were looking up about marriages No God I got I got back to the Black History Month I just there was just so much dirt there I was like oh what is there But what's crazy is that my parents were born before that year So they were like when they were babies they couldn't drink out of the water fountain yet Crazy That is crazy But you said what has changed And I was like well a lot has changed I guess a lot has changed I don't even want to drink out of the water fountain Who does Right Right Who does Oh I think he did with the with the green book That was hilarious Oh yeah What was he talking about How like uh Children today only want and how like when we were Children we would drink out of that like water fountain stand in a line and like all touch that disgusting silver and like the water pressure would come Yeah Yeah Yeah Yeah Ok And you see that green stuff going around the fountain didn't even worry about it I hear you It's not professional for the talk show I know you gotta let people talk that kind of making me feel nauseous E OK Uh you must um John Legend uh welcomed his new baby daughter Um revealed the daughter his daughter's name Don't like what why did you like it That's called a Look How cute sounds like ad um turns out baby SD name was written in the stars How do you spell it Est I oh I like the I like the spelling reminding me of Etsy the website Yeah Yeah Yeah Anyway congratulations to John Legend and Chrissy Tegan for their third baby Everyone's having these little cute names Someone just named their baby Mellie one of my friends I like that Isn't that your grandma's name Yeah And then my mother's name is Melanie Oh that's right That's right That's right That's right Um also did you know that Pamela Anderson only makes \$4000 a year for her work on Baywatch They watch doesn't air anymore No its \$4000 a year I don't know somewhere I know it does but look at her she looks absolutely gorgeous She's probably making a ton of money from that new movie coming out about Uh you know look at I mean look at this look at this I hope to I mean like look at her what This is a recent video Yes this is the other day was a vampire You know I mean I'm sure she's done some stuff like if I've done peels so she's probably done a few things She she looks fantastic She always has she always looked gorgeous Um And uh her son basically said came out and said that uh she makes \$4000 a year for Baywatch which is insane The people on friends still make millions millions of dollars from friends Ok Well no friends is on streaming platforms

school for four years then for four years I lived in NYC and then I move here I know you lived in New York City that you still lived in Jersey and maybe like commuted in you never talk about living in New York City You talked about like performing in New York City but you never talked about living in it Like living in New York City It was just like do you expect I mean no Well not terribly Oh man Uh like I was I slept on Futons and like I was renting out futons and sleeping like couch surfing couch surfing essentially between uh Staten Island Manhattan and Harlem So at 1 36th uh 28th and ninth and then in Staten Island and like close the house kitchen So my best friend uh not me but my best friend Kira Hi Kira If you're watching um I know you saw my stories this morning So um so if you're watching hi uh she lived uh temporarily by that area too and I brought a giant suitcase to come see her right Because she told me she was like she was staying in New York and um and I should come visit and I was just like oh my God it's like uh sex in the city So I brought all my clothes all my clothes and she saw me and she's like what do you plan on doing with that And I said I don't know she's like Michelle Do you know how big my place is And I was like yeah they're small Everyone lives room I literally could not I literally had to walk like this I couldn't walk straight That's that's Manhattan I had to walk like that It was it was just a room that I like because I I'm not not spend all this money for one of these closets to live in Yeah Yeah Yeah She she was there for um for the rest of school Like she had like a part time I got I had to leave one place the Harlem Place the Harlem Place Uh so we were we were doing a play we were doing a play You close your eyes and lick your lips while you're having a lot of fun over there I have a lot of fun Eighth And uh what was it Eight and 36 I had a play on eighth and 36th And then we went to a Yankee game and all my best friends came I went to the play and then Yankee game and then we ended up back at the apartment and party a little too hard One of my friends had a little accident on one of the couches and uh we all had to vacate What do you mean Accident Oh number one or two it's a PG show Oh gosh Gross Disgusting Kyle was mixing with Kyle Kyle was partying very hard Kyle We're talking about like 12 years ago Kyle 13 years years ago Kyle 13 years ago Michelle wouldn't have never like it's a lot of energy Yeah you have a lot of energy Now imagine imagine me 13 years ago the house would explode The two of us or you would be like I can't handle this and then you'd leave That's what I envision you do Yeah Like I can't handle this I wasn't really I'm not a quitter I never quit I am neither High five We had a really cool game you play Yeah Yeah Yeah That just feels like the perfect timing

Um We had a really cool game brought to us by the uh wizard that beat Mr Andy Wman the wonderful producer that we love our guy What do you mean your guy Ok Well he's a lot of people guys Ok Um this is the best friend game which is so cool Do you have the lid for the box No there's no lid Uh I I love this Um you too can get the best friend box It's like the division of the newlywed game except for best friends Oh wow The next question is crazy Um I think you know your friends So the next question is what's the most embarrassing thing that's ever happened to me We don't know that about each other No What's yours I'm trying to still rack my mind Most embarrassing thing Oh where's the lid The lid the lid for this Oh that was down there Ok I know what the most embarrassing thing that happened to me What is it Do I say it I mean if you can you tend to blurt out some things that I don't know could be on the show as good of a producer that you are You tend to scream some inappropriate things out I uh did not make it to the bathroom in time There we go There we go Have I ever oh you know what And it was in my dress It's gotta be that's that's everyone's most embarrassing story Oh my God How old were you last year Oh my God And it was the it was the uh listen Michelle are still friends to this day because of her honesty It's because uh I was having a lot of stomach issues and you know my mom had just passed and the doctor was saying that like the reason why I was having a lot of stomach issues was because um when something happens to your core uh your I I've noticed this because I'm so like quick to be like like it's everything's OK It's all gonna be OK It's all gonna be OK And my body tells me differently My body is like no be no it's actually not OK And we're gonna make you feel these things Yeah two stories actually can't believe I just told this time The first one is uh no you're right because we we we're like you know as Americans we're so like I got this I got this I got this But sometimes your body is like you don't So no matter what you say and what what you scream at the top of the mountain you don't um remember the the snowboarding story where I hurt myself and I was like oh I'm fine and my body just like started profusely sweating My body went into shock I got injured on a snowboarding trip and I told myself I was fine I was not my body went into shock and until I admitted to myself I was in shock because I was not OK I wouldn't stop sweating and I felt like I was gonna pass out and then I was immediately ok As soon as I admitted to myself no I'm not Ok So it's interesting how like you can if you're fighting your own you know intuition uh your body reacts to it and all it takes is an admittance and acceptance and it's it's crazy how like phy physiologically that changes

you now most embarrassing story Most embarrassing story I'm 13 I just moved into North Edison from South Edison And so I don't know anyone My mom's like hey make some friends on the on the school ski trip Great Sounds great Go on this because I'm good at skiing Everyone's gonna be impressed with my skills I should show them my skills and I'll make friends that way Yeah Yeah we're in the van with 15 other kids and they take off and I realize about 30 minutes in I really have to go to the bathroom and I'm just too shy to ask them to stop So I'm trying to hold it the entire ride It's like a 2.5 hour ride into the Catskills into the Pocono Sorry And uh I remember I made it until like once they started like winding around the mountains it was a rap and like now it's one thing to go you know without like in your pants It's another thing to go in your pants with like someone sitting right next to you on either side in front of you Three kids kid kid kid kid kid kid kid kid So so at first everyone's like what's that sound And then everyone's like what's that smell And then everyone's like who is that kid Uh So needless to say I didn't make friends that day had to wait a couple more months 12 I had to make friends another week maybe another month And uh so that now we know our most embarrassing story Now we do speaking of maybe we have to go to a commercial break because I actually have them Do you We'll be right back we'll be right back So here is our and box it You wanna get it charged up You use this fantastic charger over here This is the output over there and it has an extra cable like this with the ability to charge it in your car So that is really cool So we have it all charged up It has here you can press on the display you can see now that it is not drawing any power it is not bringing in any power and it is 99% charged which is cool So as you wanna use all your separate things you can turn on the little lights and it will show you as you can see there that now you can draw power out of them or you can turn them off just like you would at home if you do if you wanna leave something plugged in but not having a draw power there you can turn it off So let's have some fun and see what our Jay can fire up So in the past we have used the Jari to light up our lives with go We have charged our cell phones and we have done a few other things but oh we've even lit up the Arrow Garden How amazing is that that we were able to light up the Arrow Garden But today we're gonna push the query to the limit and uh we are gonna take a look at the this works What's this This works that car vacuum Awesome Very cool And we could even take a look at it Tabi used it and uh how amazing is this Oh my goodness You can just keep on going and going and going You can get into every little look and cranny in your car with all of

this How awesome So this is what we're gonna do We're gonna stick it into our query Let's do it this way So you guys can see what I'm doing Turn it on It's a little light and the display have gone on because we are about to fire this up Thank you Mr Jay There we go That is cool So let's see what else we can fire up today I mean that you can I mean that is just so cool You see powerful vacuum Jay fired it up Let's have a look at some of the other things that we can um fire up today Let's see Here we go So let's try the LaVoy Air purifier I mean this is a high power drawing eye item I think I would imagine So it's not something that you would generally plug into this little power port here Amazing if this works you know how incredible this must be So not only is the Jari used when you are camping or exploring the world in your RV or your car the Jakey can also be your backup power source for a disaster Um You know disaster preparedness The Jay is definitely something that you'd want to have in your home And like God forbid there is something and the air is not pure and now you're stuck in your home you've got no power You can't put your air purifiers on if there's a huge amount of dust in the air or if there's a big um you know like we are in California there could be a huge earthquake will bring up a lot of dust but you obviously want to still keep your lungs protected Let's see if the Jay not only will give us power but will also save lives So plug it in over here we'll turn it on and you can see let's actually put this up a little bit because you'll be able to see the lights So let's put that try and see if you can see that there This all in the name of Ok there we go So the little light is on We have the uh did you see that Ok Turn it on let's turn on the light so you guys can see There we go That is it So we have our Voit that is powered up You can see the lights are on over there and this is thanks to our query How incredibly powerful is this Tiny little tiny little ba like tiny little box That is amazing So these are the cool things that we can do Thanks to our Jackie Oh my goodness Look at that This powerful little thing can do all of that So here is our Jackie Unbox it you wanna get it charged up You use this fantastic charger over here This is the output over there and it has an extra cable like this with the ability to charge it in your car So that is really cool So we have it all charged up It has here you can press on the display you can see now that it is not drawing any power it is not bringing in any power and it is 99% charged which is cool So as you want to use all your separate things you can turn on the little lights and it will show you as you can see there that now you can draw power out of them or you can turn them off just like you would at home If you do if you wanna leave something plugged in but not having a draw power there you can turn it off

So let's have some fun and see what our Jay can fire up So in the past we have used the Jay to light up our lives with go We have charged our cell phones and we have done a few other things But oh we've even lit up the Arrow Garden How amazing is that that we were able to light up the Arrow Garden But today we're gonna push the query to the limit and uh we are gonna take a look at the this works what's this This works That car vacuum Awesome Very cool And we could even take a look at Tabi used it and er how amazing is this Oh my goodness You can just keep on going and going and going You can get into every little look and cranny in your car with all of this How awesome So this is what we're gonna do We're gonna stick it into our Jari I just do it this way so you guys can see what I'm doing Turn it on the little light and the display have gone on because we are about to fire this up We're talking about bathrooms and sometimes you just gotta go how you doing How you doing Gold blum A wise man once said you gotta go you gotta go you gotta go you gotta go Uh let us know where you're tuning in from We wanna connect with you We got the chats Um If you're new to the show I'm Michelle Murad along with my best in the entire world Kyle True Blood How are we doing Kyle True Blood And we have a new game called the Best Friend Game Best Friend Game Uh We're pretty good at it So we were just talking about the most embarrassing things that have ever happened to us and I think I can add that to the list I never had to go to the bathroom during filming on a live show Oh you stepped away multiple times like you know you know I can't just not say it like I mean like I I do it on the best friend the best friend let go Oh That was the last restaurant we went to the other what's my favorite vacation spot Your favorite vacation spot that you've been to Yeah that we've been to Yeah Yeah Wait that we've been to or you've been to Because I was like we haven't been anywhere together You said we Do You see So like where you've been where I've been I was like huh But we haven't even had time on vacation since we started the show Um where did you go Are you putting on lipstick I thought you were writing something Oh yes I am Look at look at my bush No maybe maybe it's Maybelline Look at my little bush in the third box You guys love her Like I love her Uh I don't think they know her but I'm sure they love her Like Yeah Ok Uh the favorite vacation spot Yeah Vacation spot that you and I that we have we have been there before I think I've made this very clear Ok Yeah Hawaii Oh I have Paris Oh I yeah I wanna go to Hawaii first Ok Yeah No Unfinished business there I can dig it No it's not unfinished business I've just never been What was your favorite food as a kid Favorite food as a kid Wait is this me or you know

what you do I don't even know favorite food as a kid I don't even know I know what it is You do I don't even know what my favorite food is You bragged about it multiple times I did on the show Really I don't know when you were three What did you ask your grandpa Yeah one of us listens Sure God that's correct Now what's your favorite food You have no idea Your favorite food You have no idea I have no Really You know when I was kid when you were a kid Mm I've said it I used to call it something else I used to change one of the letters in the in the oh I thought it was I thought you said oh that's right How can I change a letter in that I thought it was like when I I remember the lasagna stores lasagna but spaghetti is close It's close It's close I I remember I remember you like ok close You might be a better listener than me We already like known that that was just so you know you are a better listener That's why this works You're a better listener and a better talker Um who's my favorite person I follow on social media right now I don't know Why are you looking at me Not me There you go Ok What sport am I best at That's good Yeah 00000 Um do you play sports Do I look like I play sports Not at all Did you ever play sports I ran cross country You wouldn't stop waving the people and I was waving to people and I was like hi Hi Doesn't that just sound so true Like I've never heard such a true statement Like she's like I couldn't stop waving to people I was running Yeah I'd be like hello Hello Hi Hi Hi Good Target My my uh my question I said my teacher or Walmart we have to choose Amazon That pen is close to the pants Tell you that Oh this is a good one What is it Do you believe in aliens I know But you do How could you not 00000 It depends on the definition of aliens There's only one definition of an alien green living organism from another planet I believe in that I believe in that What I do What I do it's statistically impossible to not have aliens Right I mean there's more planes in the world something else alive too There has to be ok Well so did you know this uh scientists always thought that life had to come from carbon based forms like the structure of the DNA was carbon at the bottom but a cell fell and landed Uh and they found it in a sulfur pit and the basis was arsenic not carbon What does that mean That means that scientists are wrong Life can exist on other planets that don't necessarily have water and air It could be like acid in the air But life finds a way Oh I love that Life finds a way also Well I was just curious one day I was like why is the sun How is the sun burning There's no oxygen like you know when you put a lid on a candle and it goes out there's zero oxygen in space How is that ball of flame that large for that long With no oxygen Ok So it's something called fusion This is Kyle Corner for

you It's something called fusion nuclear fusion that's happening Hydrogen happens to be caught in the gravitational force of how big the sun is It's like a reactive uh process So like nothing's making something else everything's making each other Does that make sense No you're everything that you're saying is like coming at me and like words slowly like I can see the words coming in my face and just like and then slowly going out the other hydrogen there's gasses in space just gas You're saying it again it's gonna make me get it Hydrogen is the gas caught in the sun The sun is so big There's a gravitational force just like the earth like it's a gravitational force of the earth because it's so big and it's spinning it sucks you into it right The sun also has that But it's pushing I could but it's pushing hydrogen together Creating nu- nuclear fusion is when two atoms touch and fuse which is very hard to do We just did it with a particle accelerator We did we just achieved that like this year anyway Two helium co uh fused together I'm sorry two hydrogen fused together to create helium and that's what's burning Are other people following this I think someone I think someone is someone's got to wonder why they left someone out there I gotta I gotta go work on my show Someone appreciates these facts No I appreciate you OK Good good good Not just we're not all just trying to hear that Pete Davidson is bald now Ok Good sign also Did you know that about the sun I just read that yesterday Isn't that interesting Isn't isn't that interesting It is interesting One last one there's more yeah the sun's 20% bigger than it should be Ok because the explosions of and the sound waves push the sun outward The explosion is so big and so loud the sound waves push the sun outward and make it 20% bigger Isn't that insane So the edge of the sun is what you're seeing is a fiery sound wave Isn't that cool That is cool That's a fiery sound That's cool Kyle That's very cool That's very cool No you're not the only one What was the average grade in high school Yours A lot of lot of trust there I'm gonna go with I'm gonna go with a yeah Yeah there was there was classes I really didn't care about There was classes I did not care about my grade in high school A B plus A minus because no one has an A did you have an a a average Oh yeah I guess it was a minus Yeah No one average is an a it's the same I did in college 3.8 in college I was I was uh on the uh honor list or the principal or three Yeah I have like the papers Yeah Yeah Yeah they did they did uh the first time I got it incomplete and I was like whoa And I was like that's like worse than enough And I was like what's going on So like and they I guess they didn't know who my parents were because my parents were like I'm sorry mom doesn't know that we're friends No it didn't stick it didn't stick

They ended up giving me a B plus because she couldn't prove she was like you plagiarized I was like I did not plagiarize And she was like yes she did And I was like I would love to see the plagiarism and she's like I can't show it to you I'm like that's baloney So my dad actually we took him to court You did Then we won we took the school to court Correct And we won because she claimed you can't just give someone an incomplete and claim they plagiarize without proving it You're right So we were like ok prove it in court She had to prove it She took the book took my essay put them next to each other And we were like where's the plagiarism It was it was really easy in your movie It was like 10 pages of she had 10 pages to pick from one sentence is all you needed Couldn't find one sentence that was verbatim from the book because they're like why did you say that Why would you ruin his career in college if there's no verbatim plagiarism She she got fired the next semester And again we're not sure why it is Black History Month I'm sure I can pull a card because really ok so a year later I get ad and I'm like I don't get these in college No she was already gone Um I got ad I'm like I don't get D's in college So I asked them let me see the test I got a B on my midterm how my final would have to be like a 30% to get ad in the regular in the final So let me see the test and I show up unexpectedly to his office and I'm like prove it And he's like I can't find your test I was like I wanna see my compared to other people's tests and how I got to Do you think this is because of he looks at me Yeah he looks me dead in the face and goes I'll give you B plus if you don't mention it And that was for business law that was a very important class I don't like the story Let me change it It's Black History Month You have to sit through it these uncomfortable circumstances Some of us have to go through the others Gotta listen No I'm with you I'm with you I'm with you I don't think I could I was telling can't even stomach the story let alone stomach the actual circumstance No no no I was telling Dra my our friend the other day Like I don't like I all I can do is be somebody to listen to or listen But when you tell them like let's switch the subject I know I know I know I did tell every black person in that college should not go to that man You do know what I mean by that right Like when I say like let's switch the subject because it's like so hard to listen to It's really hard to listen to Yeah it is It was harder to live through I know I know I know I mean I mean I don't know That's what I'm saying Like I know but I don't so you don't I don't know I just know that you don't I know that it's too painful to listen to I can't even imagine Yes It's too painful to listen to Do you not know me It doesn't sound like a good listener to me just throwing it

out there really If it's too painful to listen to it means you can't listen to it Meaning that's not a technically good listener No I'm not a good listener You just said that you were No I'm working on being a better listener Um I said you're a you're a good listener Pretty good listener Yeah you're great You're excellent listener I said it's hard for me to listen because it's painful It's pretty Yeah But um I ended up with two B pluses Is that probably you know what I mean Like I got a B on the midterm I'm pretty sure the final was like a BB minus So I should have gotten like a B or B minus for the class I ended up getting a B plus because he was you know racist It was great I mean again I don't have that experience because like me and you know what I can never prove It's it's difficult It's weird being a black person because sometimes someone will do something like that and you're like was that because I was black or just because you're like an a hole thing that you have to be like on guard about right But also you can't be paranoid walking around the world So you're like you and you can't easily exhaust yourself with that kind of someone cuts you off like like what are we gonna do What are you gonna do the way you said it Not me because I know I know I a funny guy It's like you know you just can't go around the world just like blaming everything on that But at the same time stuff like that you have Children and they will be like what do you what how would you talk to them Depends on how they are What do you mean It depends on how the kid is Like if the kid is more sensitive to the world that's a different conversation than if I have like this boy or girl That's just like you know an absolute captain There's a there's a different way like someone that takes charge and like doesn't really like someone has something to say about them They don't care You can tell at that point Yeah my God So my godson is an absolute captain and so is his sister his sister is a bigger captain than he is They're both just like not taking crap from anyone They don't take crap from anyone One of them comes home from school He tells a story about how someone mess with his sister says how he how we solved it So he's not complaining he's just reporting it Uh There's uh shout out to Alex I don't know Alex but shout out to Alex Oh your God So um yeah my uh niece Isabelle is uh quite a firecracker and she's five She's so cute She's like you have the coolest job ever Yeah you you face time with her Yes you were here Is about really you with this when when she's five she's yes you were here The Isbell Not Isabella Isabelle Isbell and Ja So yeah Yeah I think they're doing ok My brother's uh hanging in there uh their baby tested positive That's terrifying But I think he's gonna he'll be fine They're tough He's a he's a captain He's a captain Yeah Oh yeah My brother

for sure is a captain but those kids are captains Yeah Yeah Oliver is the sweetest one out of all of them He's got like a heart that's like bigger than like this whole studio They all do They all do But you can tell like Ali is more sensitive than everyone else He's got like that big big heart But see my mom didn't talk about it with us when we were little because you know we're white like we didn't know white you're white Um But my brother went to school and I remember this so vividly and I told this story to my best friend and she didn't she didn't think this was cute I thought it was so cute Um And I'll tell you the story So my brother went to school and he connected with this little guy and he came home and my mom was like did you make any new friends And he goes I have a brand new friend He looks just like me He has dark hair but he's so cool mommy And she's like why why is he Cool He's made out of chocolate It you think that's cute Right I thought that was cute My best friend thought that was cute She said it was like you don't you don't like the kids like uh not that cute Um Not naive sheltered maybe but you use three I thought jellyfish were made out of jelly beans at this point Like we gotta give kids a break give it a break for God's sake I'm serious Were made out of like how the kids to not know we're made out of chocolate It looks the same it's the same pigmentation I love you That's so cute How old were you 12 No God no I was in preschool 12 That's that's embarrassing You're 12 You think when Barbie So is 14 That's fine Wait is it My mom was like I don't know er should we talk to her And then and my dad was like it's either that or she's gonna be talking to boys I was like you give me a little too much credit I was 14 and went to like um you know no I don't think there's anything wrong with playing with toys Um even up until did you know that a quarter of toys R US revenue comes from adults This study came out two weeks ago Of course you think Children are buying their own toys No no no I mean adults for themselves It would be 100% adults if we were looking to buy their own toys Number one still exist Oh wow I had no idea Um should put pull another card Yeah So you think that story is cute about the chocolate He looks just like me I think I made out of chocolate in our in our Valentine's Day promo We're like and there's lots of chocolate and you're like like not me Wait what's my favorite movie Quote your favorite movie I have a lot of you have so many quotes This is Lex Grossman Who's this That's probably my favorite one It's from Tropic Thunder And he goes on an absolute rant right after that This is Flaming Dragon Ok Oh wait you want to know my favorite movie Quote Endorphins make you happy happy People don't kill their husbands Oh exercise gives you endorphins Endorphins make you
