

## The Future of A.I. | DailyVee 639

This is some of the great no playing of all time I'm a purebred entrepreneur For real for real for real like documented What is sunshine You know what's funny I'm just in pain because of my back flash bag Sorry I hurt my back I'm just being in an awkward position I'm rolling my ass I think that's where the pain's going Yeah that was the left side Oh God One season later it's my back That's like killing me though I loosened it up Just did a ton of exercises and something clearly worked because it feels a little loose What excites you the most about artificial intelligence that it's going to allow people to spend more time on more meaningful critical things day to day tasks We've had a ton of focus on what jobs will it eliminate I'm more interested in what jobs are they going to create I think it's going to impact the world greatly Like the internet did just like the automobile did just like the airplane did just like the radio did just like the printing press did just like the telephone did the cell phone big technologies impact the world and they create tons of great things and create new challenges and I think humans are up for the task Looking forward to this in the future Enjoy it I'll see you there Love y'all Have the best week Hi Hi I am so excited I know that we don't have that much time I'm ready to rock and roll pass or smash chat GP T smash Focus groups of 100 people smash lemonade Double smash That's how I learn business Fake it till you make it mentality There's a lot of value in it but I think it's misunderstood You're faking it until you make it There's a level of manipulation going on Let me wear the suit I mean there's a lot of lying that comes along with it have conviction that you're gonna make it act as if very different than fake it until you make it which comes with a lot of baggage of like sleazy behavior that actually can become very dangerous because you can become used to it And then when you make it some of those things that got you there with the faking it actually become your scarlet letter and your vulnerability of losing it So fake it until you make it may lead to you losing it But have conviction that you're going to make it and act that act as if becomes a healthier version of it Thank you for having me on Thank you Thank you out Where has it gone from from like a yeah like what's the diagnosis What do you think Um a lot better because I know what it is now and I know what I have to do So instead of what I've been doing I'm gonna be doing this a lot I just tweeted it What is it The liars Lumbar or whatever Maybe it's time to start playing soccer No it's called football How are you I'm good It's good to see you Hi What do you worry about Let's start with

that building The biggest building like you say here's the good news If somebody copies you directly and is slightly better at tiktok content than you and that was what mattered You're not gonna stop them anyway What are you gonna sit and fume with her over dinner or your dad And that's that's not gonna stop them You can't stop winners So you gotta let winners win too and you just got to focus on being the best winner Like when Kobe was like working out at midnight it wasn't like he was sending somebody to like stop Iverson from working out he could only focus on what he focused on Honestly brother it creates a great life Like when I think about the other young business men and women that have come up during my era I'm so happy because I know a lot of them and a lot of them do spend their time shitting on the other ones And I'm like oh he's fascinating But I'm like you won What are we spending 20 minutes of this dinner Shitting on a third person that's also won Like that's a waste of time It's just bad energy It's a complete waste of time Let's sneak this in Can only move one spot Right Fight to the bitter end of death I'm not scared Great job brother Thanks This is really enjoyable It's good to see you I'm fucking pissed I think I got overaggressive too early Cos me a little more patient Last time I let him make the mistakes Losing I lost Yes Oh my God That was not good I just lost in Checkers after I after I beat him last year So I'm a little bit salty This is the first time we get to play with the Uno card Watch this You'll see some of the great uno playing of all time green huge mistake shit Just take that Just take that nice work Let me take this Oh no uno you can't play you can't play you can't play Uno game over I just want to be known that I said this was going to be one of the great performance You'll see some of the great uno playing of all time I need that completely broken down That was quick perfect timing for a social media post And if you were on the cards a ridiculous back and forth my back look at this shit look at this shit It's a profound time But there is something about the A I that all seems obvious it's going this way and there's some macro counter thing like will we become more human because of it You know it's like you see them going like we have more time to be focusing on our EQ skills with each other because the IQ is being like school is a disaster I was mad that they were doing it for the last 20 years with internet Now we have a I like read Lord of the Flies and give me critical thinking about it and like there's the answers probably better than what the teacher thinks is the answer Then it becomes a game of like che GP T overlay Lord of the Flies with goonies with on my block from Netflix in the voice of Will Smith Like this becomes like I mean I might just

sit in my room and just do queries I've wasted so many hours Yeah it's not  
No I actually think it's a reverse You're honing your skills Yes Real pleasure  
for you Enjoy this So pleased to have him back Please welcome Gary Vader  
Chuck I can hear you I can see all the beautiful young faces I'm feeling ready  
things like gratitude and kindness and empathy Like I get that everyone's  
oofy about it I'm very aware of the culture that we all live in I understand  
like the gender war on tiktok I understand everything This is what I do for a  
living I promise you these soft skills wait till A I comes and eats up a ton  
more of the IQ and the tangible and the black and white we're only going to  
be left with gray and these gray skills are gonna be the differentiation for you  
to get what you want period And so I I hope you develop them
