

LA Unscripted | July 27th, 2023

From hot spots to hidden gems This is your guide to all things local The L A unscripted way backyard with all three of your favorite girlfriend guides temps soaring sun sizzling There is no doubt the heat is on in southern California Happy summer I'm Dana Devin And for the next half an hour we are here to keep you cool unscripted Did you know according to the National Centers for environmental information the highest temperature recorded in SOCAL was back in 2012 on June 17th Get this at 3 57 in the afternoon The mercury red lined at 130 degrees even for summer Love in So Cal that is too hot to handle So Olivia and Jasmine Do you guys love summer I mean 130 degree Give me 80 90 That's fine I love I agree You can go horseback riding all that stuff How about you I like the summer but I do not like the mosquitoes Hence why I go nowhere without my B spray She's been spraying my bracelet Ok That's your must have But another summer must have is a happy get together with our sponsors At the OC fair Hm This is a slam No Wait this is a home run The OC Fair started 133 years ago as just a couple of horse races and a few exhibits The first fair here at this location was in 1949 and we've been here ever since let's do it The fair sits on about 160 acres of properties or kind of a very big fair in a rather small footprint And that's one of the reasons why we limit our attendance every day so that everybody that comes has an enjoyable experience and it's not too crowded We all know the best thing about the OC fair is for sure the food So I had to stop by bacon A fair Get bacon a fair There's so much new this year So even if people have been to the OC fair before they got to come this year and see it So first of all the food is incredible These are candied bacon wrapped pork belly bites pork on a stick with sugar and maple syrup and delicious goodness for hot days like this there's regular smoothies or there's maple bacon smoothies Have you ever dipped a French fry in your ice cream This is that all right I am super stuffed So I just got a lemonade and I called in some reinforcements to help me Hi Jasmine What did you get Shrimp I love the Fair The fair is on through August 13th We are dark on Mondays and Tuesdays The fair opens at 11 a.m. every day and open until midnight and people can go online and pick the day They want to come to the fair They need to buy their tickets in advance on fair dot com We are at the Great American petting farm at the OC Fair and of course we're located right by the green gate So it's really easy to find It's free to come in which is very exciting If you'd like to feed the animals you can you do pay for the feed it's

optional but a lot of fun Do you want to feed them with me I do want to feed them Ok I'm gonna feed the pregnant mama She deserves it Do the animals like being in here Oh they love it They absolutely love it So you see the huge variety in here right It is incredible I don't think they know that they're different from each other They're all raised together on a beautiful ranch in Texas and they love it We feel really privileged to be able to bring this experience to kids all over the country The story of the week has been this excessive heat right But not in Costa Mesa I mean look at this breeze It's unbelievable 3214 I love absolutely love watching people experience the fair We have three new rides This year at the OC fair I just love watching the fair on people's faces and how much they're enjoying it I just love the fair It's the perfect thing to do in the summer Thanks for inviting me Yeah Thanks for coming This is great up here We get a breeze So nice food and fair That's all you need in life especially in the summer And who doesn't love all that deep fried Fair food The Ohio State Fair is known for its giant deep fried gummy bear Are you kidding Texas is known for the original Deep Fried Coke Jasmine What's your go to Oh I love the pineapple with the fried rice in it My favorite Oh that sounds amazing Ok What about your new favorite since this the smoothie with bacon in it What does it taste like Bacon Yeah it's like well it's like is it like sweet and salt It's like sweet and salty You know when you dip your French fries and I like that Ok I got you I got you Just the thought of all that fair food could make me break out I mean I already am but good thing any is checking in with some style smart secrets for skin Ok Doctor Eva you are known you are the expert for all the treatments I come here for everything from face smoothing and refresh to back b to getting my stomach ready for the summer You are the expert and I am so grateful because you are giving us a style smart exclusive today I'm the first one you told about this That is absolutely correct You were the first one to roll it out because I love taking care of you and I want you to have the very best care not only in the office but when you go home so think about it like you go to the dentist you go to the dentist you have your teeth clean you have your teeth whitened And then what do you do You go home You have a glass of red wine you have coffee and they get stained So you're going to brush your teeth right You come to the office we spend all this money on radio frequency micro needling on electromagnetic stimulation on all these procedures and then you go home and do nothing No no no We have a new device that is going to help improve the results of those in office treatments that you're going to take home with you Dr Eva What is the name of this tool

The tool is called Kara Clarify A activate R restore a amplify This is it Look look how cool it is in your hand The first one is clarify Oh So that's a you have acne and so yeah so it's a little kind of bluey purple light And so it has a low and a high setting Let's just say I see a little blemish coming on popping up I would immediately grab my car tool on my bathroom counter and do it for 10 Then the next setting is the restore setting So you can have a quick fix before you go out So the red light is going to help stimulate your cells to make more collagen It stimulates the energy production part of the cell and it's very anti inflammatory as well This is also the amplify setting So this will really help drive your active serums into your skin through a process called electroporation OK So this tool is kind of like extra credit after you've done your homework and you've come in and see you and gotten the device on the big machines Then you get to do extra at home today What are we doing to my face So everybody as they you know maybe mature just a tiny bit their brows drop just a little bit So today what we're going to do is lift your brow So we're going to use the activate setting So this is like an at home bra lift and you can see that little twitch you get that twitching It's amazing how quiet this is like I could be doing this while on a conference call and no one would know And that was so easy I can't believe it I was so quiet Now the car tool is so exclusive It's so VIP there's only one way to find out everything about it when it's coming out Exactly Follow me on Instagram and Doctor Ava says ok that's all great I'll check every day but because I'm your favorite I mean I can just take this one Ok L A unscripted Has you covered this summer So what is your favorite way to stay Cool DM Us And we just may show up in your backyard yet We do It Don't go anywhere We'll be right back Welcome back to L A unscripted I'm Gina Devin and the entire LAU crew is back yarding for this special beat the heat episode So you know they say gardening is growing in popularity So do you guys garden Do you have a green thumb Absolutely not Me neither OK I'm with you guys I can't even keep a cactus alive but I can plant myself down at a local hot spot like this Grass Madri is about the environment vegan Mexican food Uh We're 100% organic Uh We're a sustainable company We use a lot of local farms The name Grass Madri originated uh from Mother Earth where all our food comes from and what we put in our body I have a lot of guests that come uh that come to me afterwards and say you know I didn't even tell my friend that it was vegan and throughout the whole meal she didn't you know they wouldn't say anything And at the end they would tell me you just ate a completely plant based meal Every single dish is made with love So that is

the reason tastes good God is good This is the most honestly the most beautiful tortilla soup I've ever seen Tell me about the tortilla soup This is not just beautiful It's good for you Uh This is uh based in vegetable puree So these have onions garlic bell peppers tomatoes all good for you Oh my God And this is a vegan burger Is a vegan burger Yes man We combine rice beans mushrooms and we dust it with the tortilla chips and it's a beautiful burger These are kind of one of your signature dishes right Yes ma'am Now these are carnitas and they look like caritas They smell like carnitas But what what is it Actually Actually it's Jack Fruit Kierra gracias Malde We do everything from his crush Why is it important for you to to present these vegan dishes that taste so good but are also so good for the environment It's just not just good for the environment It's to make harmony with the universe And also it's really important as as humans to take care of ourselves When you become vegan your mood change you're more happy your skin your wrinkles disappear a little bit you're happy with your tummy And like people say use food as a medicine And while many of us are enjoying the green and great outdoors this summer the Department of Public Health warns that there may be more mosquitoes and pp than usual There's one with our sponsor Cory Pest Control for some at home taking care of the bugs and doing a good job and doing it trying to do it right all the time has just been a wonderful feeling I grew up on a farm in Michigan My father made me the pest control person when I was nine years old because I was complaining about the worms and the apples He said OK you take care of it And then I came to California with General Motors I was playing poker with some guys on Saturday nights They were in the pest control business They kept telling about bugs and I say no that's not right So I go up and get the books and say see this is the way it is So they told me I should go down and get my license and be in the pest control business And so I did that was 54 years ago when you have snails in a particular place I mean that escar go s escar go to us but it's also escar go to the rats You say how come I've got all those dead shells you know Well that's because you know they've got rats and my grandma in the south of France would collect them and then eat them because she well you have the citronella candles for the uh mosquitoes The trick is is you put it under the table not on top of the table because the mosquitoes bite you in the ankles Generally the other thing is is that mosquitoes fly up wind about 3 to 5 miles an hour So what you do is you put the citronella torches in the yard if you're going to have a party knowing that they're going to fly up wind So which way is the wind coming from What I did is I put together I mean I had I had

a lot of time sitting in a chair drinking beer saying what in the world am I gonna do about this bug You know and so then you sit back and you develop what you think is the perfect program training the people on doing it that way so that you have good programs done by excellent technicians and that's really the secret to the whole thing Ok Cheers babes to backyard Yay But you all don't have to move A scripted is still heating up Stay with us How are you handling this summer's unscripted heat Well let us know because we want to try it too Meanwhile on the canyon roads and local freeways drivers insist it is time to go topless cars people convertible cars And so our cars really are our second home Like honestly my trunk is like my second closet just trying you bring suits in the back of your cars We do live out of our cars and now we put it in drive with our sponsors at Toyota All right I love that Toyota makes it easy for you P intended to be able to just really have an experience with the vehicles right here at the fair So show me some of the cars What's the fun one Toyota has been a great partner of ours at the fair for over 10 years People love to come to the fair and see new things Right And what better partnership than with Toyota to introduce their new models Yes new car smell You can't beat this So how lounge But this year the theme of the fair is happy together You can come here you can hang out you can relax you can get involved with our guitar hero game You can spin our wheel that we have here for a number of prizes like sunglasses he pressed bag So there's lots happening here Do it big money big money big money This is a place for you to kind of touch feel and experience these cars first hand from the you know to come to the to drive the B for X which is our fully electric vehicle Lots of hype around the electrified area if you will on the Grand Highlander that's also new look at this grill We all are familiar with the highlander and we now have the Grand Highlander which is going to be a little bit longer a little bit different But you know what It's pretty amazing Yeah it sure is grand It is grand and it is considered a mid size SUV So you're still getting that comfort and everything But when you talk about performance you're getting 362 horsepower in this Grand Highlander we can't forget about that new Prius that was just redesigned to just take it in Ok Yes definitely This is the coal car right Is this is the one to check out This is the Prius prime which means you have that all electric driving range which has improved pretty significantly up to 44 miles of all electric driving range Then from there it's going to switch over to your hybrid technology and you're looking at 50 52 MPG combined leading fuel economy That's what this vehicle is all about This is a new car a new addition to the fleet talk

about the crown It is the Toyota Crown There's been a lot of excitement around this It's kind of sporty meeting elegance It is like no vehicle that we have in the lineup Currently it is a hybrid as well You're looking at some great power to 340 horsepower but 41 MPG in this premium sedan All right I'm passenger You drive this time There's a lot of space in here It's definitely luxurious So it is a luxury sedan in the Toyota lineup They always do a fantastic job of putting together an interactive footprint where people can come not only to see the vehicles but they can meet VIP S they can play games get a little shade and just have fun guys It's roomy enough to fit a whole person in here and the days that are open we are here What you see now we're going for a drive going for a spin Why not You know how summer can bring back the memories Well cars can actually do the same So what was your first car Ok I had a Volkswagen Jetta and I actually gave her a name You know how you name cars I named her Pearl I love that name for a car Ok What was your first car A Ford Escort I didn't name her She was a little bus in Oh my God me too Yes What was your car I had a nice one on a camera What kind But it was busted And so I had to climb in the side of the car Like Dukes of Hazard Remember they climb in the window Seriously But my all time favorite was when L A unscripted launched almost three years ago And the producer surprised me with a custom car wrap Oh I love this This still gives me the feels It's a lot of different wraps I mean this is a promotional wrap We prefer to have two or three days to do it right But if it's a really rush we can do it in 24 hours And do you think Dina is going to love this I really hope so I really hope so because we are doing it too too much with too much love You know we love that girl and and I hope she like it I really hope so Oh my God She has so much energy She's amazing and fun and you know what You don't see fun anymore And she makes people laugh How far are you willing to go for this show Would you let us wrap a car with you You know would you drive it around Yes So George at my office created the artwork we sent over several different objects and styles They picked one and as a surprise it's a fun idea to surprise somebody Imagine you come out to your car and see your car fully wrapped It's like wow what is this What's going on Let me see What is this Can I see 23 and Oh M Timber Lane Hey Oh my God Thank you so much I know we're not supposed to hug but I have to hug you Oh my God That is incredible It was those guys Thank you so much Oh My God That is incredible So you actually drove around with your face on a car You know first of all my face was so huge but I have a huge head anyway But the thing is you have to be so nice because you can't cut

people off You can't put your finger in your nose You can't do anything when
your face is on your car you have to really behave But I hope you had some
fun in the sun with this A threesome Where will we be next Who knows Stay
cool You guys ready to go to the k ready Yes
