

LA Unscripted | March 31st, 2023

From hot spots and hidden gems to lots of local flavor It's your guide to L A the unscripted way And tonight we're unlocking one of downtown las most unique spots Hello everyone and welcome to L A unscripted I'm Devin and this is all of tell you a giant studio filled with one of a kind found objects imported from around the world Tonight you are getting a very rare treat because the only way to come here and shop is to wait for the drop Ok I found my heaven in this place Oliver Tellier was really born from an adoration of objects with old souls So we really love unique pieces that are a little rough around the edges that have a story to tell And we really wanted to create a brand and a business that uh was doing things a little differently These are a very popular item We have a few marble items and they are usually the first things to go on a drop day We set up this really exciting and unique experiential retail concept um dropping unique collections every two weeks Ok So this is like a whole basket full of these beautiful like antique stools I love them because every single one is different So these are one of our most popular items People love these The cutest thing is that we have uh our customers bring their kids and we can see little kids picking these out sitting on them on the floor It's adorable We open our doors to the public only once every other Saturday Our current opening hours for those Saturday drops are 10 a.m. to 2 p.m. And as you mentioned we do experience a line of excited shoppers and fans from our community ready to enter the space when we open doors I've seen these in antique stores for thousands of dollars I kid you not This one is \$245 I mean you really aren't kidding when you say you try to keep the prices very fair We're really looking for items that have a story to tell And so what you'll find here ranges anywhere from 20 \$5 up to \$2000 and beyond So we have our beautiful Greek pots here We have marble from India We have a basket from turkey uh paper mache from India There's something for everyone It might be a unique vintage bread board um that you could use in your kitchen to just add warmth and texture It could be one of our quintessential olive jars There's just something for everyone to really warm up and then add character to your space Oh my God I'm in love with this I know it's a fountain head Actually we're constantly exploring new ways to expand our brand and lifestyle beyond Los Angeles across the United States And with that we are exploring an online shopping experience for our customers and community We are constantly focused on developing and building a great team here in Los Angeles Look at these bowls They're so

beautiful like fill this with like lemon and fruit Laura um is an old roommate of mine Ben uh was my boyfriend when we actually started this venture and he is now my husband So the three of us at various points have lived together um have decorated homes together and we really looked at each other one day and we were like why is it so hard to find these really unique special objects at a fair price Is Hungarian doll ball We started as we mentioned on Instagram we moved then you know a few months later into a 5000 square foot space in Culver City And less than a year later we've opened doors here in the iconic arts district of Los Angeles with a 22,000 square foot showroom So um we are just holding on for dear life and really enjoying the ride and doing it together because that's what we love is that it really comes back to being sustainable and reusing It starts by us selecting the items and the objects we'd like to bring home then they get packed and prepared into the container and make their long journey to us What is actually so crazy is when those doors open you really don't know what you're about to see if a pop's gonna come flying out of your head It's a really exciting moment You know it's really like it's it's like Christmas for us We're opening this present and we never know what we're what we're really going to find We have antiques we have vintage items we have some reproductions That's what we really love is that these pieces are not just being thrown away We see the beauty and the individuality in all of them coming up a blast from the musical past with the Bob Marley experience We'll be back with more from all of in downtown L A In just a moment Cutting dental has been making people smile since 1968 including someone you might recognize When I first walked in the cutting dental I looked like this And in just one day I walked out looking like this I have more positive interaction from people walking up to me and saying I saw your commercial that I'm gonna call I saw your commercial I'm gonna call or I get are you the lady on TV Are you the lady on TV Did it hurt being a personal trainer My appearance was so important but no matter how hard I worked out Nothing was gonna fix my teeth more often than not I'm really sitting sometimes in parking lots and in gyms and talking to people about cutting dental cunning Dental has been here since 1968 Uh We we say we've been making smiles great since 1968 Uh Doctor Cunning is an amazing dentist Um he built this whole office from scratch Uh We've been like a pioneer for uh sleep dentistry and the teeth in the day Uh he's been doing it since uh for over 23 years right now And uh we have our own lab Um we create our own products and we're very proud of that Your smile is your indicator to the world of how well you're feeling how

well you're doing I took that lightly for a long time I I didn't think people cared but then I said you know what I care So if I care other people must care I've been a coach and a trainer for several years and I knew in order to grow my business and my personal brand I knew that I needed to correct my smile and for a long time I could approach certain people but I was also unapproachable And so when you're in the industry of fitness and wellness everything was ok from the from the bottom up But I knew I needed to invest in myself From you know from the neck up infinities is really the best teeth next to your natural teeth we put the teeth in we build them individual crowns like that OK So it gives it that individuality So it gives you that really high aesthetics because it's kind of like individual teeth made and we can customize you know the teeth the position of them like anywhere And the individual milk crowns are zirconia crowns which is very very very very strong So it gives you that really nice strength over here for the functionality It gives you the really nice aesthetics like this for the individuality of it And the bar gives you kind of like the cushions kind of like a shock absorbent under to take like all that stress and it touches us You know that we can touch the people in in that way and change their lives Welcome back to L A unscripted I'm de and we are giving you a rare look inside downtown L A All of you right now Jasmine Sins is taking a musical look back at a reggae legend after stops in London and Toronto The Bob Marley One love experience is bringing the love right here to Los Angeles and you can be inside with us Let's go Bob Marley One love experience was conceptualized about five years ago around the culture passions lifestyle and also the human being that Bob Marley was there is Bob Marley the rebel there's Bob Marley the lover there's Bob Marley the exiled human like there are so many layers and I think that's what continues to attract us here at the Bob Marley one love experience There's seven full immersive zones So we have the music room which really celebrates all of his releases as an artist and really celebrates legend which is the greatest selling reggae record of all time I shot the sheriff Oh hey sorry I'm just jamming out Don't mind me I do We have the one Love Forest We have the soul Shakedown studio which is a silent disco Got the beautiful life zone the concrete jungle art zone This is really a space where you can kind of just chill for a minute and take it in and you know not feel like you're rushed to go anywhere else We've got the next gen zone and we have this awesome black light area and backstage corridor as well Marley's really have been part of this experience you know in so many ways not just as collaborators but they also have been really additive by bringing in you

know Bob shoes and finding pictures that haven't been seen before and really finding Little Easter eggs that real Marley fans will find interesting and amazing And we'll be right back with vintage comics in scripture from all of returns in just a moment Welcome You are great You brought all the latest and Greatest Spring Finds before we talk about it So let's do a little cheers Yum Yum These are Yum Suja Susa is an organic cold pressed juice company that offers a variety of options They only use USDA certified organic that are never GMO The best thing about Suja is that their juices and shots are crafted with daily wellness and nutrition in mind They blend organic fruits veggies and ingredients to empower your power from the inside wellness to the outside wellness This product is really unique It's called RR is a skin care company that uses hyper spectral skin imaging and smart A I formulation to uncover your unique skin biology They have created a way to actually read six layers beneath your skin to a simple smartphone facial skin So basically it uses the latest A IA I technology scans your skin and it gives you exactly what you need in a serum Exactly And there is no one else like this in the market right now It's so soft on the skin and I love that you can't find it in stores like this has to be personalized to you which is it's really nice Isn't that this is so special I know that everyone's gonna be buzzing about it Speaking of buzzing All right Next one is Bu Natural A woman owned company founded by food scientist Doctor Ashley Samani So what is B and U Natural They are the superfoods from beehives always sustainably harvested The number one bee product in the U is 100% natural non GMO Paleo gluten free and soy free B New Natural is a Propo supplement to support your immune system Best part Olivia guess what All products are caffeine free Perfect We wanna be outside We wanna be back in our lives You be getting sick No way So give me some of the I've sprayed this but now that we're in spring what's the best way to get the spring glowy skin I got you covered Olivia It's called Halo spelled Heilo Halo is a skincare company made from a new premium line of products that reverses the effects of aging halo restores and achieves a youthful glow your skin the pharmaceutical grade So you can see results in only 14 days Halo removes spots and even stone to the point where you don't even need a foundation and you can find them at halo skin care dot com I love it with Halo You can glow like an angel I love that What about me The spring must have that in my opinion I am the most excited about the nutter This is life changing Nada is a Wellness brand committed to improving the plant based milk industry all in the comfort of your own home can get better than that A healthy all natural

plant based milk is just three steps away Olivia you this is in your house
Wow this is so good and creamy This is like a game changer going in my
coffee going in my cereal you know what it's going in my house And on top
of that I'm taking everything else about me You know me You're the greatest
You found all the best the best I love you Thank you CFFCFF Forever
Forever Welcome back to L A unscripted from all of that I'm Dana Devin
now while some people love a vintage pot like this one from Turkey It's
comic books that make other people line up especially at this spot Hi my
name is Ryan Lebowitz I'm the co-owner here at Golden Apple Comics a
comic shop for the Stars When you read a comic book similar to if you read
any book you know you have that escapism What's cool about comic books
is the visuals and you actually get to be in that world The name for example
doesn't really tell you a lot And so when you see that Spiderman up front it
kind of clues you into treasures Could we inside My father started this shop
back in 1979 You know we're on our 41st year we've seen the customer base
expand hugely I would say a lot in part to the movies and television uh that
are based on comic books The Spiderman outside designed by Stan Lee and
then Tom Holland and Zendaya One day the Avengers walked in you might
have seen that on James Corden Golden Apple was dubbed the comic shop
to the Stars Michael Jackson was a frequent customer We have a box we
keep for Samuel L Jackson that I hand curate for him He's a huge fan of
comic books and graphic novels Sam loves anything with the word samurai
or having to do with samurai Even if we have a small store we're big in on
our reputation old young from every every walk of life And if you don't
know anything about comic books that's great We want you to come in and
we can find something for you The FCC has allocated a record \$42 billion to
eliminate the digital divide But according to the internal services department
that funding may not even go to those who need it Most the internal services
department is sort of the backbone for the County of Los Angeles We
provide all the services that support all the other departments in the county
ranging from building maintenance to uh purchasing and contracting
environmental fleet services mail services you name it we do it But most
importantly we also handle support of information technology for the county
from A to Z So in Los Angeles County there are literally estimated to be
over 416,000 households that don't have the internet In addition to that
there's about 1.1 million households that have an annual household income
of less than \$50,000 So when you combine you know the cost of living
implications as well people have to make choices What do I spend my

money on Is it rent Is it food Is it clothing Is that the internet delete The divide is an initiative led by the County of Los Angeles to advance digital equity and underserved communities through partnerships infrastructure investments and technology resources that empower residents and small businesses So what is is D's plan to make sure everyone in Los Angeles County has access to the internet when the federal government releases this historic amount of money We were very fortunate that the board of supervisors allocated \$56 million for this initiative but it's not enough in order to really provide the level of access that people are going to need So we wanted to depend on the federal dollars and one of the major ones is \$42 billion that the FCC is releasing throughout the nation to build broadband infrastructure in order to close the digital divide Well it's based off of priority maps The maps show that over 97% of Los Angeles County is ok They don't need the funding Their maps also identify priority areas and it leaves out many of the historically disadvantaged communities within Los Angeles County Their maps do not include South L A East L A Southeast L A Why does it leave those areas out It's based off of the data that they use which mostly is was provided by internet service providers saying that there is access and there's sufficient access for people to have the internet We don't deny that there's not infrastructure we know that But affordability is the issue And it's important that people see these maps you go to deleted dot org we have the maps posted and it shows you how you can write in and provide your feedback or challenge the maps for where you live without that voice It will continue this way and the funding will go to communities that may not have as much need as we have here in these disadvantaged communities While they're there they'll also be able to see that delete the divide and ID offers other apps and programs for them Correct Yes So in addition to getting the internet and getting the high speed quality internet that communities need there are a number of resources we have laptop giveaways free laptops that people sign up for subsidy programs We have outreach programs we help small businesses in getting an online presence Those are things we're offering to the community now in addition to getting them the internet So it's a holistic approach It's not just one thing people need help in a lot of different ways And so however we can help them to get assistance now is where our focus is and that is all the time we have for tonight Thank you so much for joining us and thank you to all of you for the beautiful surroundings We'll see you next time Good night everyone
