

LA Unscripted | December 9th, 2022

From hotspots and hidden gems to lots of local flavor This is your guide to L A the unscripted way Hello everyone and welcome to L A unscripted I'm Devin So you know by now this show is all about living your best life So let's get right into it with maybe the best pizza I have ever had No joke It's called Gorilla Pies which is appropriate because the flavors are huge I kid you not I still think about this pizza all the time So Gorilla Pies is a small batch artisan pizza shop that we like to say is Pittsburgh style with the California Soul located right here in the heart of Valley Village So we're making the Uncle Phil This is our new cheesesteak pizza That's the best idea I've ever heard We grew up in the heart of Hollywood We moved when I was about 11 and Jake was about eight Our mom is an is an avid gardener She would always be in the garden every night was an adventure It exposed us and our palates grew at a young age Why Uncle Phil It's a bit of a wink and a nod To Fresh Prince of Bel Air which is one of one of one of my favorite shows growing up Oh my God I started out working at Nobu on La Snag in 2008 Then three years later I was offered a promotion to be the executive chef at Nobu in Moscow I got a job working at Mama Shelter Hotel in Hollywood And then the shutdown happened immediately Kind of just said I've got nothing to lose And I love making pizza and I just kind of didn't miss a beat made a call to this guy and kind of just started doing that on my apartment I've been professionally eating since since I was born and and I'm really good at that So that's where my taste comes in And I'm a touring uh DJ and producer So I've had the luxury of being all over the world and trying different things So when opening up gorilla pies with him you know I'm I'm not a yes man by any means He is a resident consumer and tough customers I have to give a lot of a lot of credit to my father who is kind of a wild genius in his own right He saw and heard what was going on and on a whim just started looking looking at pizza restaurants He I think he found it on Facebook My mother who uh Wendy Osher who is on the Ventura County Arts Council I asked her to curate the wall because I grew up in a house of art and I wanted this place to feel like the house that we grew up in and be welcoming and homey And one of the reasons why I fell in love with pizza is pizza is one of those things that it can be as mundane or as fancy as you want it to be It just depends on how much passion and care you put into the ingredients and the technique of what you're doing Why is mine sagging You're using your fists We're gonna lay our ranch down This is just our basic

pizza cheese guidelines No rules Everything that's on here is going on the pizza I don't like rules either in the kitchen We say you burn you learn just look at that thing Oh my God Look what we did I feel like we're parents What is happening Oh my God The sauce the the garlic ranch with all the crispy of the vegetables with like kind of the sweetness of the cherry tomatoes Oh my God And the beef is delicious Oh Good job Cheers Oh my God Best day ever I ate the entire pizza I kid you not And I still wanted more All right What To know where tomorrow's fashion designers are right now Jasmine Simpkins found out today I'm going back to school and learning all about fashion design right here at F ID M and Look look what I made actually this is what you made My name is Angelo Fuentes and I am an F ID M instructor All right Are you excited I'm super excited You are going to be cutting and sewing today Awesome I'm game Let's do it F ID M is located in the center of downtown L A It gives the students an opportunity to actually have everything that has to do with the fashion industry from fabric sourcing to actually working on projects This amazing project was actually brought to Fibm through Netflix to promote the film The School For Good for students were selected based off their quality of work and their development in design They had less than a month to develop everything my design is Um I'm based on the Evers and that's for the School of good It uses a lot of color They pull from a a bunch of different areas and time periods It's baroque inspired it's Asian and Southeast Asian inspired It's Renaissance inspired it's French inspired I hand painted and designed all my text for these looks I was given the School of Evil or the Nevers and you pretty much just had to create a look inspired by one of the characters and I went with Charlize Theron's character um because like the red hair definitely caught my attention and the fact that she wore a lot of like suits and double breasted jackets and stuff like that So I'm designed this for School of um Evil So that's why I'm gonna choose like this more like a black color but it's a reflective chameleon um material So it looks like um gray or um under the natural light there's a lot of period pieces in the movie So I really wanted to highlight uh corseted almost like structured top but I wanted to give it the flare at the hip color is my staple in my design work So I knew that I could just go crazy with the color It took about five days to design my look Um I'm also new to fashion sewing and uh pattern drafting So I've learned a lot in this last uh year and also in this project projects like this are very very exciting for the designers and students here in F ID M because it gives them the opportunity to branch out and actually network in real time You're doing great You heard that guys lift

your foot and then let's go to the end There you go Good job You literally made something out of nothing and it was flat and you gave it a full body shape Look at that I not only graduated from the school of F ID M basic sewing Also the school of good and evil guys I think I did good And here's something everyone wants for Christmas A new car I got a ride with today's very cool sponsor This is the Toyota Marai it is Toyota's first mass produced hydrogen fuel cell vehicle That means that it's a zero emission vehicle that uses hydrogen as fuel You don't plug it in and you don't put gasoline in it You go to a hydrogen refueling kiosk like this one here that we're standing in front of and you refuel it with compressed hydrogen very similar to putting gasoline in your vehicle You just simply attach the nozzle and it takes five minutes and you're on your way Oh my God this takes five minutes And then I know people that it takes hours and hours and hours to charge their electric vehicles That's right It could take overnight it could take up to 20 hours to charge an electric vehicle but this only takes five minutes and you can drive over 350 miles with this type of technology One way that you can find a hydrogen station is looking at the California Fuel Cell Partnership website and they have an active station map and there's also an app that hydrogen seekers can also use on their phone and inside of their Toyota it is now on oh my God It's so quiet Toyota has been working on hydrogen fuel cell technology for over 20 years So the Toyota Prius actually means to go before because it was meant to get us ready for this type of technology And Toyota Marai means future in Japanese because Toyota believes that this is the future of the automotive industry Ok This is really cool And you're not able to see this back there but they have what's called a heads up display where it gives you north south east or west it tells you which direction to go It's got all your N A plus it's got all your MPH and your ecosystem and probably how many miles left you have on your charge Like it's really really well equipped The only thing that comes out the back of the Toyota Marai is a little bit of water So when you press the h2o button all of the water that's stored in the vehicle will be expelled out the back of the vehicle It's a party tricks There are so many benefits to owning or leasing a Toyota I first of all you receive complimentary hydrogen fuel you receive a fuel card with \$15,000 when you purchase or lease the vehicle That's good up to six years If you were to purchase there also is 0% APR for up to 72 months right now on the Toyota I and the Toyota Marai qualifies for the HOV lane sticker So you can drive with just one person in the HOV lane which is a huge benefit here in Los Angeles There are so many features in this car Can you show me

some of them This is a wireless charging pad for your cell phone There's three different drive modes normal ego and sport There's 14 JB L speakers of the toy Of course our 12.3 inch touchscreen display is going to have all the information that you need That is our parking button that will help assist us in parallel parking Of course you can't miss this gorgeous panoramic moon Oh this is such a nice car It's so smooth Wow this is really really nice and it's fast too coming up Olivia glide high over So so glad that wasn't me She is so brave will be right back today's dish I happen to like because anything where I can sneak the veggies in into a noodle dish and it's got this spicy peanut dressing So uh the first thing is just cutting up the veggies and really can be anything you like I have some red pepper cucumber some shredded carrots I always have a bag of shredded carrots in the fridge Levi What's up Are you gonna help me make this I'm gonna julienne some peppers and then cut some cucumber Oh I know what you can do How about you pick some cilantro leaves Will you do that for me See all the little leaves on the stems you can just pick those off and I have some water on the stove boiling to cook the noodles So you're gonna cut the cucumber for me We'll split it I think what I'm gonna do is cut them into little sticks We can do some green onion onto our cucumber sauce So I've got creamy peanut butter Do a little uh sriracha sesame oil lime and then garlic garlic in a little hot water We have soy sauce or coconut aminos A splash of soy Now you can hit blend OK hot noodles I got rice noodles So while it's warm you want to put the dressing This is when it flavors everything when it's hot and it's gonna just soak into those hot noodles They're gooey and soft I like a lot of sauce in Goes All of our veggies Look at all those beautiful colors We've got our peppers our onions cilantro and there you go you've got a yummy That's good Levi coming up we visit a very special place here in So that takes care of Hollywood's greatest assets Welcome back to L A unscripted I'm de and if you look up in the sky right now Santa isn't the only one you'll see flying around You actually may catch a glimpse of Olivia Day Hang gliding is a gravity driven aircraft where we just find a large hill and you run off of it and just by the fact of you slowly falling through the air that drives you through the sky Now this is not just for tourists You can actually see all of San Fernando Valley You can see downtown L A and if we get really up high you can see clear across the water to Catalina Island So it is the perfect place to experience your own hometown from a whole new perspective So this will be what's supporting you and it's actually what will pull you into laying down position Like Superman wind sports is one of the oldest and largest

hang gliding schools especially in southern California We've been teaching and flying here for over 40 years and it's where you can really achieve your dreams of flight So we can't use the F word fall Yeah we're not falling We're not skydiving we're not a rock we're a bird We fly we're using the F word I started hang lighting here back in 1982 with my good friend Joey was my best friend in high school and for my very first flight I was just hooked Um And what made it so appealing to me is when I sleep at night I can fly in my dreams The sensation of flying a hang lighter is just about the same as the way I fly in my dreams People do come here for adrenaline but it is actually often a very relaxing or even therapeutic experience We actually do do an uh a date experience and even proposals I yeah we do offer a couple's package where you fly near sunset So you have beautiful light on the hills and it's very romantic And if you wanna upgrade and do a proposal we'll actually write in the landing zone Will you marry me with their name In giant letters Some people might be watching this and they'll think you know it sounds amazing but I am terrified of flying We like to say it's as safe as the pilot who's flying it so you can make anything dangerous or anything safe Basically by how you approach it and our hang gliders are actually thoroughly stress tested by the manufacturers associations And then if you just go through the proper training and make good decisions it's as safe as any sport Congrats you're an official student pilot Yes I have the official paperwork No big deal Cameras are rolling I'm geared up and we're about to take flight What John and oh can anybody do this Pretty much anyone We do have some limitations but you know they're pretty clear you know we like to stay above the age of 14 and there are some physical requirements but most people cannot say 90% of people can fly We hang gliding is not just a one time experience for a lot of people Some people get hooked after just trying it once And we have the program to actually train you all the way into becoming a competent mountain flying hang glider pilot So you can go off any hill You like solo Most of our training actually happens at Dockweiler State Beach which is just south of LAX It's hard to leave a day of flying and not have a huge smile plastered on your face and you just leave all your worries behind on the ground That was the greatest thing ever I'm obsessed Thank you so much And you are doing something really cool for our unscripted years Right Yeah For anyone who's watching If you use the promo code unscripted you'll get \$25 off any flight experience just like that We do it Ok If you love show business movies television plays cetera then you need to know about this place Hi everyone I'm here with Bob Beacher

from the motion picture television Fund And we're about to take a tour of this campus and find out about all the amazing things that happened here We're a not for profit We were founded in 1921 So we are now celebrating our 101st year The MP TF is the safety for the entertainment industry We are 100 and one year old organization that exists to support those who bring joy and love through film and television through financial services and a wealth of services as well as this beautiful Wasserman campus where we are today We've built out about 22 acres and we've got a continuum of care independent and assisted living skilled nursing memory care a beautiful theater lots of dining rooms and it's a it's a Disneyland for seniors I would say the work we did during the pandemic literally saved lives Uh And if we weren't here God knows what would have happened The Motion picture Academy gave us an Academy Award an Oscar statue for the work we had done during the pandemic Over here we've got doggy wood which is our dog park Oh I wouldn't have come without my dog He's my baby On this campus We have a wonderful MPF Studios where our residents are creating their own content We have in house cable system We need to make sure that their social existence their mental health their creative desires their spiritual needs are all taken care of A great example of that is today We are rehearsing all about eve a radio play that our residents are putting on for me to thank you as equals would be presumptuous And I at this ripe old age of I'm playing the now where else could that happen We're hosting a telethon in partnership with KTL A on December 10th prime time 7 to 9 p.m. And we're so excited to bring this to you with our host Tom Bergeron and that Nicole Brown who are very invested into MP TF And we have Phil Rosenthal who everybody knows and love you love film and you love television and you love all the content that you get during good times and bad times Then you need to support the thousands of people that bring you that content It's not just who you see on the camera but it's the grips It's the makeup artist It's everyone who comes together in this beautiful family to bring joy and passion through this medium No donation is too small whether it's \$5.10 dollars anything that you can give really matters We serve 7000 industry members with financial assistance and more important to me We spoke to over 30,000 industry members to say hey just checking in How are you doing Well I think that if if anybody came here and saw this campus and saw how we live and how we're taken care of at this time in our life they would want to help us and we need some help now So anything that you can do that you can give to us would be so appreciated and would uh guarantee us a continued life like we have it

now So we wouldn't worry Everyone loves film and television and our community our wider community needs to say thank you for the incredible work you've done It means everything to me It changed my life for the better They're wonderful to us They treat us like family I can't say enough about it I love it And that is all the time we have for tonight Thank you so much for joining us We'll see you next time
