mouth of babes A star is born living in California Your diary Today I start you by video diary So are you like the coolest kid in your neighborhood or at your school Because you're an actress Well I think that all my friends really understand a lot like it doesn't face them but it's awesome What Because I know when I'm in it and I'm in it all yet You have some really fun co stars Y who is my friend Michael Yo we're all just like laughing at all times It's been an adjustment for people who haven't seen the show Tell us about your character Well it's about Amber She her best friend just moved away and she's going through a divorce and she's starting middle school and it's just kind of like a hard time Um And she uses her video diary and her animation sketches to kind of help her through that I Amber Brown do not like change So when did you realize like hey I want to be an actress when I was little I just felt like I had this extra energy that I needed to put somewhere like that time Bill Do you have a favorite actress or actor Yes For so many of her things are so versatile that something I really want to be able to do is like you h and a Brown be able to do both of those things Well speaking of she's nominated for an Emmy for her show the morning show I know you don't watch that But would you love to be nominated for an me one day That would be so awesome I just think that that's a really high almost the highest level really an actor can get to So it would just be such an honor to be able to do that some day You have other fun activities you like to do when you're not working Well I'm a really big dancer We come here for laser tag all the time We're at MB Two Entertainment in Santa Clarita Valley It is a seven acre facility that has laser tag We have virtual reality We have a huge go kart track drift track basically Anything from ages you know four years old to 80 All right guys when you guys walk in the room you're gonna be transported into a downtown urban skate full of black lights There's a lot of fire hydrants places to hide lots of places to run Good luck I don't need luck I'm gonna win That's you're right there I bet I won high five high five Yes I predict an Emmy in her future All right Are you ever too young or too old to be style Smart Well not if you have any secret weapons We are doing everything we can today to get red carpet ready for the Emmys So I had to call him the big guns from Beverly Hills Dr Miller is here with us today What do people want to fix and make better people want to make their skin look brighter They want to have less fine lines and wrinkles I love doing surgery no doubt for sure But not everybody wants to have surgery and especially people who are looking to get on the red carpet So the technology that I acquired is our most popular treatment is soft wave and soft wave is a non surgical way to

lift the area underneath the chin You can lift the eyebrows you can sort of out fine lines and wrinkles The great thing is there's very little downtime with this but literally they could have this one day before they're on the red carpet So it's like getting a brow lift in an hour Oh absolutely And compare that to surgery which would take several hours and lots and lots of money This is a very affordable quick solution Now Hollywood already knows has already acknowledged soft wave You know they've gotten awards from Elle Magazine Cosmo Shape New Beauty that's major right there But I want to know truly who is this a good treatment for Like is everyone a good candidate Soft Wave is so cool because you can use it in the summer time the winter time So it works for all skin types and it works in all seasons which is pretty cool Anyone can do it I would say especially someone who just starting to show some fine lines and wrinkles a little bit of sags under here A little bit of droopiness of the brow It's perfect But we've had patients as young as in their twenties and patients in their seventies and eighties who love the treatment How many times can a person do this Is there is it once a year Is it every six weeks Like is there a limit You can do one treatment You can have multiple treatments Some of our patients will get a treatment every six months to just keep building that collagen Atlas and and replacing it doctor How can people find you the Og of Beverly Hills right You've been there for 24 years to make an appointment directly with you Maybe for a soft wave treatment consultation Sure The best way to get in touch with us would be to go to our website or to my Instagram which is at the next doctor or they can call the office I told you we would give you the real deal and if room service and sneakers is a real I don't know what is Thank you so much to the bo chaos team for my due to stylist on you Are you killed it as usual I young for this amazing down not for the jewelry and to the R and JW Marriott Los Angeles at L A live for letting us go off script Emy Oscars KT A five is your couture channel all year round Where will L A unscripted pop up next You never know but can someone unzip me and can I have this dress please
