

LA Unscripted | January 5th, 2022

It's a city where anything can happen So what could go wrong or right as I hit up L A unscripted It's L A's most photographed structure Hi everyone I'm de and we are inside the Bradbury building It no houses brand new one and bar This is just one of so many hidden gems So let's get right to it Now revealing another must for local wonders Traditionally people drink tea to socialize So it was like a centerpiece for conversation Hi my name is Samuel Wang and I'm the owner of ST L A and I am revealing the art of traditional Chinese tea So I grew up drinking tea with my family Uh when I was uh raised in Taiwan it was really comforting It was really fun to to surround myself uh with this practice and having actually having friends over and drink tea I always appreciate it appreciate my own culture and wanted to see what we can do to bring a little bit of that to United States and to Los Angeles Currently everybody is moving such a fast pace So for us we really want to push for this slow living type of life coming to sleep since I think tea itself is very calming Uh We've had computer engineers Uh we have people on dates You know you can really really kind of focus on each other when you're here doing tea because tea itself is very uh it needs some care it needs you to make it it needs to you need to wait for it I grew up with these Oolong are what I drank Well what my dad drank So I just drank it drank it with him So that's what we want to focus on here So it's the moment right The moment of having friends around having people around you you know having that conversation around tea the old tree is floral orchid Malt vanilla wood Yeah So this one is from Yunnan China and this is picked off a tree that's been there for 300 years Uh We tell everybody we're tea room first But when the pandemic hit we put a little bit more focus on food and take out and delivery do some outdoor tea ceremony which is really nice to see This is our setup generally if you come and do a tea ceremony uh indoors or outdoors So this is called a fairness cup put in there Since you can see how much tea you have in there you know how much to share with whoever is drinking with you How many times can you see it for a black tea generally you can do at least six This is so soothing So now that I've kind of watched you can you kind of coach me through it Can I do one Of course Ok I'm going in the fairness cup because I don't want you cheating with how much you get is a 5050 state It's a different color It's almost like drinking wine because there's layers to it Do a tea ceremony online even though you can't serve tea to your friends But I think everybody can gather over tea still or

have a virtual tea gathering still come through and buy the tea ceremony at home We were happy to share all the knowledge we have How do I say Thank you in Chinese It says Xie Xie Xie Xie too much sh down in there So you want a more like a X like a XXX I said a bad word So what is going off script mean to you Well for us it's rediscovering the old or finding the new now are so how born and bred unscripted Jasmine Simpkins with this next address to check out I wouldn't have never thought that God would chose me to be the one to redo this place all over again I'm Nina Rose Welcome to Nina Rose's penthouse at the Maverick Flat The Mavericks Flat is a historical landmark venue that's been here since 1966 A lot of legendary artists have performed here Marvin Gaye Tina Turner the temptations the ojs a lot of black artists that came through here I knew it was on Crenshaw I passed by I had never been inside of this place A good friend of mine had the place and it was sitting here um for like almost two years It was like a haunted house So I just told him I said you know what I wanna get the place I call it the resurrection of the Maverick Flat Jasmine Welcome to Nina Rose's penthouse It is beautiful Honestly like I absolutely love it It was tough Everything was shut down I mean if you would have seen the place it was a disaster but I had a vision and God always gave me vision and I seen past all that and you decided to make it a private venue pretty much bring it back to what it was Exactly And and you know what it was funny because I didn't even know that it was a private venue back in 1966 until the guy had told me that So that was like a confirmation for me that this is what you need to do with the space We are here in L A South Central I wanted to bring the Beverly Hills feel the upscale feel I wanted to feel like we were somewhere else but still right here in the inner city someone wanted to rent out the place What could they kind of events Could they do birthday parties wedding receptions graduations you name it they can do it here Movies has been shot here We shot insecure uh has been shot here Uh Lace has been shot here to be a good feeling for you that you're a girl from Los Angeles and now you own a piece of history in the city It's a blessing It's a blessing to be able to be a part of something legendary Do you have a local hot spot or hidden gym to share the US so we can be your neighborhood Go to and for more fantastic local find state tuned in from the win and bar at no house Bradbury will be right back Welcome back to scripted from the iconic Bradbury building Hi everyone I'm David Devin and from movies to TV this iconic construction has started in so many blockbuster scenes Now they were to is out and about and adding and add to the list How crazy are the wipeouts on wipe out We're

giving you a behind the scenes look of the hit show to wipe out has been around since like the beginning of time What is this secret Why do people love it so much and why do people keep coming back from work I mean I think there's a certain magic to watching people fall down from your couch right It's very fun to be like oh I could do that I we went bigger we went bad we went crazier on the course And the show at its core is about the contestants I think Nicole put it eloquently if we were like watching people fall down sometimes you just have to let your child spread their way crash into a giant rotating hoop and wipe out Doesn't doesn't look outside itself We know that the show is about having fun The show is a fun based show where the contestants who sign up No they're gonna wipe out So they're all very light hearted They all have great personalities and I think that's what makes the show down here with Jesse Jamie Welcome to wipe out Thank you This is crazy We are so high up right now Where are we All right I hope you're not afraid to hide off I'm OK I think I'm literally I'm not I was so ready for this I remember seeing the graphic ahead of time being like this is new We did not do this in season one So season two I am ready We are here in the action You're in the thick of it I think we have the best view in the house I was going to say this is the greatest spot ever We have this team called the black and blues and it's a bunch of young kind of guys and girls that love to test all of our challenges for us I've done a lot of these big shows but like this makes me nervous You can see the bubbles behind us It's called aeration And that's to make the landing a little bit softer Like the very first time we put someone in there and we shoot him down and we expect that he was going to land right in the bubble He flew further than anyone's ever flown in our course So we made a slight adjustment That's what the black and blues are for right What is the biggest wipe out you've seen And what is one that we should be looking out for this season So I think everybody's like has their own favorite style We tend to really go when someone does let's say a 20 ft fall face first And not only can you see it like it's almost as if their entire face hits the water and nothing else but the sound that it makes and everyone is a great sport But man it just looks it looks harsh Would you run it with me I would totally do it I think I would I was even asking them today I was like can I do it Can I do the slide part This seems like the best part of L A What do you think we can do The dream team Yeah I like that We always ask for a team name There it is There you go Dream team here on unscripted We love to serve up some great stories and you Who else loves to dish Our Megan tell us each fish I crafted without any compromise I want to indulge my

customer 100,000 to Japanese sushi I want to distinguish myself distinguish this restaurant So I want to be special Cannot compare to anywhere else in city Chef Masa First of all I'm honored to be here with you today We're going to make some sushi But what is so important to you about those knives They're so sharp I use many knives My knives that traveled with me in more than 10 years Part of my profession cannot stay away with them I was born in a small town in Hokkaido City called Hakodate in northern part of the big island in Japan Then I moved to Tokyo to the sushi at the restaurant kitchens cooking schools gives you just idea Um just knowledge and just on the head walking the restaurant in the back of the house front of the house Uh sushi bar more practical learning rather than classroom and just go and circle See the ridges Here's this this isn't salmon this is tuna Here's the tuna OK Dip my fingers in there Yeah You put the figure on the with your hands you need to shape the light in the free pogo Oh And then you pinch it It's so called this name in Japanese It's storage rooms This is big enough for storage but not big enough for restaurants That's why we have only eight cities We could provide more 1 to 1 service more past uh you know cooking to them This is eight is enough preparation and presentation right Chef Masa they done Thank you so much Do you approve Yes Am I hired Yes Ok From tell us talk to rich on tech with what's worth a click today We've got an apple Yes Yeah Even the core with the core food scraps may never have to go into the trash ever again Now this I had for breakfast This is my avocado No pit No thanks to a new appliance that turns them into dirt Now this come on There's no way Yeah it'll totally work It's called the Lo me from Sustainable Product Company Pila It was a crazy idea Three years ago Matt Berli is ceo food waste is a huge climate problem You know food in landfills just produces methane Methane is like lighter fluid for the atmosphere It's terrible The kitchen compo is pretty simple There's a removable bucket on the inside Just fill it up with the food You might typically toss into the trash Let's put the rest of it No plastic no plastic No it works with many items that will naturally break down like bits of fruit veggie peels coffee grounds and even some paper The machine itself has a bunch of sensors and software in it right That's monitoring uh humidity heat oxygen So we can kind of like design the environment for a breakdown Add some water and a special tablet loaded with bacteria to help jump start the process You turn it on when you go to sleep kind of what you do with your dishwasher And then while it's running effectively it's taking all that and it's turning it into usable dirt Once inside scraps are agitated heated and more the \$500 machine has just one button to

select a cycle that lasts between four and 20 hours Here's what the scraps we put in look like After a night of processing compost ready to be tossed into a flower bed or garden It's getting it to a place where it can be added into existing environments and that's keeping it at a landfill and that's a huge win And we have more info to make your life easier better and happier L A unscripted from downtown Las beautiful Bradbury building will be right back The Bradbury Building may not look like much from the outside but step inside and welcome to jaw dropping All inspiring architecture It's kind of like the heart of a scripted We want to take you beyond the obvious and scratch more than just the surface of our city now Something else Oh so amazing you may never have known was right in our own backyard So we're actually fans of L A unscripted We follow the show Hi I'm Roger and this is Paul We're from Savory Roads Catering and we dare Dana to come and make Paella with us Savory Roads is a paella catering service We specialize in Paella and that's my love my passion We are in a Los Angeles based company but we do travel all over We've done Paellas in San Diego We've done Paella in San Francisco Palm Springs We've even done one in North Carolina Ok I accept your dare I am so excited I don't know if you know this but I love paella My family loves paella Well we're in for a treat Ok You're cooking it I am cooking it and I got you Someone may die here Oh this is perfect Our paella are customized to the specifications of our clients We can do everything from a traditional paella to a paella mixa to a vegan Paella also have done kosher friendly paellas where you know we can satisfy the needs of those who can't eat certain of the ingredients that we use All right So I see a lot of ingredients here Well this is the paella mixa and the paella mixa consists of seafood and chicken And I add chorizo because I love chorizo How did you learn to make paella I made Paella because my parents used to entertain a lot and they would hire chefs to come and make it when I was a kid And when I move on to college I actually my apartment became the hangout for the Spanish department We would dance flamenco poetry recitals guitar and then I would make the PAA for everybody So you can take this to people's homes and you can do parties We can do you know 300 people 500 people We're gonna start with the shrimp And why is that We're gonna season the pan We do a quick sear on the shrimp and then remove it OK This smells delicious It's better than Chanel better than Chanel It's paella number five What is it about paella that you think you love so much I love paella because paella is a family dish It's normally eaten around the table on a weekend and traditionally it's eaten right out of the pan Everyone grabs a

spoon and has their side I don't know if anybody else can read it but us But it says lau is this my plate This is your pipe We're well we can feel so excited OK Hold on Yeah W pa paella made by Dana Wow Oh this is delicious It's like seriously like a symphony of flavors in your mouth So good We we made Pa Dana dare complete Oh my God I love this Think of us as your treasure map to happy Now how about these healthy vibes Mckee has always kind of been a concept that I've had since I was a little girl My name is Courtney Denton sing and I am the co-founder and Creative director of mckee performance wear for a sustainable active wear line made in the USA for teens across the country So we were founded in San Diego Everything's made in L A My parents were living in San Diego Um right before COVID happened And so my husband got deployed at the beginning of 2020 I moved to San Diego and stayed with them My grandma was an avid sewer I just spent so much time with her sewing and ironing fabrics was like my favorite thing to do And so I knew fashion was kind of where I wanted to go I did a lot of focus groups with parents and kids who are between the ages of like nine and 15 about what it's like to shop with their kids and what it's like to shop as a kid And it's really hard for kids to go shopping at that age because some of them are right at the line between still being in the kids' clothes and then almost being an adult size and all of our fabrics are in stock L A fabric So everything that's here in L A we get stuff from Round Finder which is for those who don't know basically a company who takes in fabric from other companies who they no longer use It's called Deadstock Fabric So instead of sending it to a mill or getting rid of it they repurpose it and you can use that everything I pick I feel first with my mom she's my partner It has to be super buttery soft but also sweat wicking and able to be active in it Four way stretch We do a military and first responder discount That's continuous It doesn't end And um it's not only for the service member themselves but their entire immediate family because while they're sacrificing their time so is their family So we wanted to be able to give them the opportunity to use the discount as well We wanted to have three initiatives Those are two And our last one is when you buy m key product any purchase you make version of each item goes into a scholarship foundation And so starting next year um we'll have kids apply to help give them equal opportunities And I also know you have something special for L A and scripts like discount code Yes Yes So if you go to our website at the end of check out in all caps you'll put L A unscripted 30 for 30% off the entire website Thank you so much to the No House Bradbury team for letting

us go off script in your amazing space Where will we pop up next I don't know But maybe that favorite spot You just DM US You never know We'll see you next time
