

Russia, Putin, and Ideological Subversion

The Joe Rogan experience is Russia is Russia considered communist still I mean Russia they don't they dictatorship So actually no let me say that Let me say that right I'm wrong No they have elections But man the whole but if you want to run against Putin bro good luck good luck with all that You ain't got much time When was the last time they had an election Well you know that guy Prigozhin who tried to make a a coup against Putin and he just died in a plane crash is that that that coup that lasted like six hours The guy who like they were literally headed towards Moscow he was the head of the Wagner group headed towards Moscow and then they pulled back at the last minute and and Putin's like yeah bro I'll see you in a little bit and this plane blew up in the sky There's a video of his plane in the sky and it's like on fire in the sky Nothing suspicious about that Yeah Yeah I mean it's kind of crazy but like Soviet Union was communist and then the Soviet Union fell like the history of the Soviet Union and in today's Russia is really confusing to me Like I don't I don't know what to believe I don't know what to believe with anything Like when when in regards to history like man it's just like what is real and what's not I'm just like fuck I just like OK let's just see how everything plays out But Soviet Union fell So I thought like Russia is claiming like uh democratic socialism or something sort of democratic but Putin is basically running it because Putin was the president of Russia or whatever you know whatever they call it over there And then he stepped down and then his main guy took over and then Putin's like fuck this I'm taking over again and now he's running it and he's been running Russia Was it When did he start running When was his second term as the president of Russia I have also has uh a fucking uh Soviet passport or Russian passport Roy Jones Roy Jones junior is tight with Putin Interesting Yeah Well he's a star over there man Really Yeah man He he had a bunch of boxing fights over there They love him over there They they love like you know elite combat sports athletes and Roy Jones junior in his prime was the fucking man Yeah When you talk about the all time greats you can uh in his prime He may I I would say he's the best technician ever One of the best athletes that's ever competed in boxing He so fast Think about that one round he had with uh Vinny Paenza where the only round in box history Yeah And comp box history where Vinny Paenza couldn't land a punch Incredible incredible And then Roy tried to stop the fight He was teeing off on him He said the referee come on man It's over the referees like continue He's like all righty

ok Putin has been Russia's most powerful politician since he assumed the presidency in 2000 Um after resignation of his predecessor Boris Yeltsin and but that he stepped down for a while and then came back again though But he was like still kind of in power if he still remains in power until 2036 his tenure will surpass even that of Joseph Stalin who ruled the Soviet Union for 29 years We're supposed to have six year terms but he created a new law that can allow that term limit to be reset It's a good move It's a good move if you wanna run things That's what Chris Rock was saying about Trump when Trump made it into office He's like he's never getting out of there He he'll change the fucking laws He's not going to stop being president I remember Chris Rock was saying that on stage it was hilarious You know that guy Yuri beso that you bring up every now and then and he explains um ideological subversion right If that shit's real and it seems like it's real then does that mean Russia is responsible for all our shit If it's not real What a prediction what a crazy prediction that we would lose all faith in our democratic process and that we would all the Children from the universities will all adapt Marxist Leninist philosophy They all do I mean how many people are young kids They consider themselves Marxist Yes So are we are we in the middle of a fucking of a Russian infiltration or is it Chinese Well I think both of those countries are very clever you know they they do some very clever things One of the things that China does is they buy up corporations do you know any put someone showed me a list of all these corporations that are run by China I don't even know if this is true Is is is uh what's the the Chinese President Xi Jin Xi Jinping is Xi Jinping And um what's his fucking name from Russia Putin Putin Are they like buddies because they're both like communists Right Well I'm confused there I'm sure they're united against America now You know and if Yuri Beso if he's right he's basically saying that Russia has has put we're under some kind of like 20 year Russian infiltration ideological subversion planners What he what he was basically saying was that they have this very long game approach Whereas the United States we try to do things quickly and we think about short term whereas in Russia they think about things very long very long Yeah they they're not afraid of people dying over there because they lost so many people in so many wars I mean if it wasn't for Russia Russia holding off the Nazis Russia helped us win World War Two in a giant way in a fucking giant way And you look at the losses that Russia faced What was that The one battle that Shane Gillis brought up during the podcast like Shane Gillis is a gigantic history buff and he brought up this one battle where Russia lost some fucking insane

amount of people holding off the the Nazis I mean insane amount of people like way more than any war we've ever lost That was one of the things that people always said about Russia like the girls are so hot and there there's like they so outnumber men because so many men died so many men died over there So for the longest time it was like this overabundance of these hot Russian women and how many of them came over and became spies Yeah man it's like what the fuck is going on It almost is going on It's like I don't know what to believe anymore dog It's like it almost seems like there's a there's a great awakening and then there's a great reset you know Klaus Schwab talking about the great reset Um And then there's a great awakening A lot of people are waking up It's like sometimes I feel like the great awakening is winning and then sometimes I feel like the great reset is winning Like when you start like all this fighting that we're doing we're fighting over like dumb shit all the time like all the time like bathrooms gender Yeah Meanwhile like this new world order is like uh like digital currency and climate change Yeah it's like what the fuck is going on It just seems like it seems like um like like like there's our politicians here you know the ones that we see the ones that are on TV and then whatever is above them the guys we don't see maybe they just want to just destroy America Like how do we destroy America How do we make it I think what they want is control They want control the way that China has control the way that Russia has control and there's so much freedom in America in terms of freedom of speech and freedom to do whatever you want It's like it's like uh like on the surface we see the left fighting with the right right on the surface right But what if the overall goal is to get us Like the only way we're gonna have like a military regime like the controllers they want as as much of a military regime as possible Maybe disguises it So we don't think we're under but the best way to do that the most uh the e the not the easiest but the best way is you gotta make the people embrace the military right You gotta make them embrace How do you make them embrace it right now We're kind of embracing it We're like oh where's the military tribunals and all that shit With all the shit It's almost like that Like were we tricked are we being tricked into embracing the military Like there's so like I don't know which way the shit's going It's just so all over the fucking place man There's like all the stuff that Biden is doing It's like it's like who who's advising this motherfucker you know what I mean Running again And then they're talking about the story about Michelle Obama running that keeps coming up
