

## Tony Woods' Possible Encounter with Bigfoot

The Joe Rogan experience on that show I tell a joke about Bigfoot I never saw Bigfoot but I was when we were we were on training you do these training where you go make maps and all this shit And we heard him you heard Big foot big foot I heard him What does it sound like I could still do that He does that but he everything you see on them stupid TV shows that happened He threw a rock All the animals started running and then marine cause you know he's the guy who knows where the markers are but we didn't know where the markers were He's the one who says hey we we're at a perimeter Have you guys ever heard of Big foot Blah blah blah blah He tells me he was native American but he he said that and we where were you guys What state Uh like Nova Scotia Nova Scotia where they do cold weather training Hm Yeah And you have to make your own map You sure they weren't fucking with you I'm pretty sure who did do do that route Somebody that was fucking with you No I know why you fucking with the animals too All the animals ran to remember how you said they know how to get away They all these fuckers just they just did a little mass exodus And it's a it's a very skeptical of Bigfoot I've never seen him but I never heard anything like that either So what if you had did it sound like uh it just it it it was uh what was it similar to you ever hear Luther Vandross Line Like when you hear him on the record it's one thing but when you hear him live he oh like that he didn't sound like that but it was the same power power like hair on the back of your neck Kind of what the fuck Well you know bears do that sometimes bears uh especially when what year what time of the year was it It was it was winter because you listen to the wind It's like it sounds like a train coming You determine where the wind is coming from and like get like on a tree or something because alot of the um icicles are coming like darts Oh wow And that night we who joking I was joking around about it and everything and and one of the officers says you know this is a facility and you know we don't heard you're a comedian We don't make you basically you can't you can't go on stage and go hey guess where I was at and and so I just I was just in the joke I'm just camping and we uh oh I see Yeah But there's nobody's in the military but we and and in the joke I actually do see Bigfoot It's it's a fight So tell me So how did it happen What was going on What were the circumstances we will lay it out for me Ok Yeah you have uh you get because it's cold and it's raining So we're like in a little circle It was and it's kinda raining kinda sleeping And we're talking about well you know

we're gonna do this and do that cause we're comparing shit and everybody's fucking up We found our third marker first Like it's supposed to be like a two or three day thing right And the good teams like you do it in the classroom for a couple of days and then the team goes out team come back team goes out and some of the guys who weren't as good as us in the classroom were coming right back in two days They just spent the night spent one night and came back Shit man We was on our third day dog and then our first marker was the third marker but he couldn't help us But then after we heard that he's like look you guys fucked up Who was just cause we are So how long did it take in total Oh we left right after that dog He told us we just yeah he didn't want to be there in the morning We wanted to be there So yeah it's a lot of fudging going on Ok So he said yeah good enough So you guys were out there and like explain to me what happened and and who was telling you that It's Bigfoot Well we all heard it when everybody's like what the fuck And then everything was running deer everything is just like but we heard the you know how you throw a stick through the through the branches He throws like it's just like a big something just flew through the trees And then that's when he's he he's kind of you know and of course we're like fuck out of here But it was it was just it was just too weird to Yeah And then and then he was like yeah you guys missed your other markers I might know where they are So we just kind of went and got all our markers and went back to the base because we we're out dude we're out like 20 miles Oh you have to make it there with Bigfoot Well I wasn't really worried about Bigfoot because from according to that dude Bigfoot don't bother you I was worried by the other animals So that dude seen Bigfoot before I don't know if he's seen it before but he just said he don't But he he just let you know when you've gone too far in the woods Like nobody wants to believe Nobody ever says that he grabs you and do not He just does warning things just like on those stupid TV show You ever watch those shows Oh yeah We heard to say it's been the least successful successful show ever They've been trying to find Bigfoot for like eight seasons I've spent the whole day on the road Like if I'm running my hotel I spent the whole day They're about to get it Oh shit Oh me too And then I'm like it's they got me again like fuck go get something to eat you know Yeah that's not those aren't so successful I mean the best they get is like a sound Yeah that's all I got reality shows man They're not really reality They fuck around they fuck around with editing you know I was on one of those What do you do The naked one a naked one naked and afraid I did with you man You know how about I had a uniform on and we all got bugs

So I know my suffering also I don't know if they look at how how bad can you get fucked up and how quickly can they get you to a hospital
