

Orcas Attacking Boats and Shark Attacks

The Joe Rogan experience wasn't it You telling me about the whales that learn how to orcas Yeah They've learned how to fuck people's boats up That's that's so funny to me It's crazy It's kind of hilarious because for all these years we've been mistreating them And finally they're like enough I'm gonna start fucking up your boats and they're real smart creatures They probably teaching every whale in the ocean how to do that Probably at least the whale's there I think it's only one part of the world where this is happening right now But the problem is the word gets out Yeah They have they have those songs they sing and they go hundreds of kilometers and that's how they tell each other Hey we fucking people up over here Did you see that video of the people in a kayak and a whale swallows them No these people are like they're whale watching and there's a whale down there and the whale literally swallows the entire kayak with the people in it So they weren't good at it and then spits them out I mean the whale doesn't want to eat a kayak But how you whale watching and you don't see the motherfucker Well I think that's how they were whale watching Look at this literally just takes the kayak Maybe he's annoyed with them Maybe the maybe the kayaks are fucking up their fishing Look at that bro That shit just broke your back California Beach Oh yeah Easily could snap your legs in half easily could snap your neck But they don't eat meat right now But I mean just the power alone How does it know what it's doing It's not gentle I mean hopefully you can you still got hope It'll spit you up Hoping Yeah Hoping Yeah Look at that That's from a different angle Fucking insane Did it really Oh no kidding That's weird I'm good on all That's weird I'm good on it I know it went viral again which has been happening with quite a few videos So you see all the fish that's there See how the fishes in the water flapping around That's why the birds are there See all that That's splashing shit That's fish So the the whale trying to eat the fish and these cock suckers in this kidney Did they survive Yeah he spit them out He wanted the fish He didn't want a kayak as a pool You need them seriously injured I don't know Good question I don't get it I don't get I don't get these people that need that need life risking Uh They don't think it's I mean this is this is this is in the top like if if going down to the bottom of the ocean in an experimental sub is is number one this is on that list This is top 10 Did you see the guy in the kayak that got attacked by a tiger shark No no he's in the kayak rowing And you see this tiger shark just engulf half the side of it was shark watching No he was fishing Was that

fishing in his kayak and watch this Look his foot's in the water too man right Look at this p A shark Tiger shark ram me Holy Watch this So his foot So his foot's in the water right That's the paddle is to the left but his foot was in there too Look at that thing Oh so he was like waving it like this and he thought the shark thought it was food The shark probably thought it was a seal or some shit They're not smart Yeah bro I don't get it I don't get this this this desire to thrill See look at this in slow motion Let this thing come up Fucking a man Thank God that wasn't inflatable too Who um what did I hear This is shark shit Some sharks attacked a boat recently You know about the dude in Egypt that got eaten I heard about it It was it was it was one of the bottom of the barrel tops but I didn't know what the fuck That was a rough one This dude is in Egypt and he's off the shore Netflix Crews whole boat exploded after back to back shark attacks in Hawaii Like something out of jaws Oh my God I think they were filming it So we'll probably not see it until oh my God Oh our planet too So that would probably be really good Wow because it's like a right out of jaws So there was a shark attack a shark attack and then the boat exploded attacking the boat Yeah like if it exploded like because the gas then yeah that's right out of jaws But is it saying it exploded or are they saying it just fell apart I think fell apart I think they said a rubber dinghy Can you scroll back down a little in there It says uh Nolan said the crew was only about 328 ft from the shore So they're able to make it safer to land though barely on land that they patched up the boat and deployed a rubber dinghy But that was attacked by giant rivals marine fishes that can grow up to 6 ft long and weigh more than £100 That attack knocked out the dinghy's motor What the fuck man The behavior of the sharks they encountered was extremely unusual Nolan told radio times they were incredibly hungry So there might not have been enough natural food and they were just trying to anything that came across in the water Wow It said it was just released
