

Sean Strickland Expands on His Press Conference Comments About America

The Joe Rogan experience Now I could go back to my roots of being just a white trash motherfucker It's nice man I really accepted who I am you know Well it's it's so interesting to watch people go through these changes in life in these trials through adversity and become like a very interesting person at the end of it You know like I I you know I know you say a lot of outrageous shit and it's very funny but you also say some very good shit You know like this speech that you gave when you were talking about America like the the that speech the post fight press conference speech it's a fucking great speech Do you know what it is I mean I I'm white trash Like I like what I mean by that is like I am the future of America So like like both my parents work you know my dad's p shit but you know fucking in hell probably right now But both my parents worked they made good money but we were poor we were poor because after the cigarettes the bars and the fast food were fucking poor I mean like you know we had like fucking I can't tell you you'd find a piece of paper and you wrinkled up You use that fucking toilet paper You know every time I wipe my ass with a when I find a piece of fucking paper you get laying around But this is like it's like this unholy alliance that corporations are doing to America They want women working they want lower wages and they want more consumerism And it's like I don't mean it like I'm not sexist like oh put women back in the kitchen you know they suck and I love fucking women you know take off the burke and wear a fucking bikini and Haah But but you know what I'm saying But we're we're truly like in a in a weird time to where like corporations are eroding eroding values of America Well they act within their best interests in their best interest to keep people consumers and make sure that people just pay attention only to stupid shit You you have Walmart in the in the in your phone now you wanna go I mean I can't even even me I'm to blame There's some times you guys where I'm like man I'm a little depressed I don't know I fucking just in a bad mood I'm like I'm gonna go on Amazon Let's see what the fucking Amazon fairy is recommending me today Maybe I could maybe I could find something that will give me a little serotonin boost Find some happiness in a one click And then so it's like you and then you have like and then on top of that now we go full circle you have two parents working and I'm going mostly on the west coast You have shitty fucking kids Dude Las Vegas Graduation rate is less

than 50% high school dropout No GED I'm not one to talk But how do you raise How do you raise a family a successful family when your kids are being raised by the system By fucking tiktok After my fight I had the doctor you know good good guy the doctor You see he comes up to me He's like hey why are you why are you talking bad about Las Vegas I'm like well Doctor John whatever your name is Doctor cool dude What what school do your kids go to And he just like gets a big like smirk I'm like yeah I'm sure you're paying like 5050 plus a year to educate your kids Like so again man I mean where's the reset button Maybe there is no reset button I think the reset button is teaching people that there's things that you can do in life that can transform you And I think as weird as that sounds a lot of people learn that through watching people like you evolve through fighting because it's the most difficult thing you do outside of war And being a cop and being a fireman it's the most difficult physical pursuit that a person can get involved with for a living But again we're talking on such a deeper fundamental level if you have no belief like we could say America is becoming an atheist Like we could say that if you have no belief if you have no moral right no wrong And you're not taught this from like a stable family and you're being raised I mean like literally America is becoming like communist China where like we're letting our school system dictate values and beliefs We're letting the system tell you what your kids are And again I'm agnostic So I'm not I'm not telling anybody to go find Jesus You know if you're gonna find somebody at least let's let it be fucking Jesus right But uh I mean how do you how do you fix a moral decay of a society when that's just where we're going Yeah tiktok man even in even fucking communist China will will mitigate what shows on tiktok but they give us utter fucking filth But it's just uh I know exactly what you're saying and you know I went through the public school system but I did it in the 19 eighties and it's very different It's a lot worse now But I mean how do you like again like if you were you know if you were God Joe Rogan how do you fix this You gotta you gotta pump a lot of money into inner cities You gotta you gotta figure out a way to make programs and there's there's places in this country that for decades and decades have been filled with crime and gang violence and drug addiction and that's all they know And that's that's the standard of their community and that's what you grow up with and that's what you see and if and if we don't fix that the odds of those people coming out of there I mean there's a few that come out of there that become you know uh whether they're artists or athletes or whatever it is they find a way through they figure it out but they're the rare ones they're the rare

ones which we gotta do is create systems where you have opportunity for kids and also mitigate the crime and mitigate the violence and and whatever the fuck has to be done Look if they can dump billions of dollars into Ukraine if they could dump billions of dollars into I mean there's so many different things that they they pump money into but they've never pumped any money into Baltimore they never pumped any money into Detroit Like try to figure out a way like if you can like think about like what Halliburton did during the Iraq war they got these no bid contracts where Cheney was the fucking CEO of Halliburton He becomes the Vice president of the United States and then the company he works for gets these no bid contracts to rebuild shit We blow up which is wild but there's profit in that right So what about figuring out a way to funnel that profit into fixing inner cities If if we have less losers we have a better America and if you give people more opportunity you have less losers you know So even let let's go on the smallest scale of sex Like yeah how old are you Joe 55 When when is the first time you started watching porn I ask that question It was a VHS tapes came out when I was like I probably was like 15 15 or 16 So I mean we had uh my so my brother is a few years older than me So he remembers things that I don't but he'll tell me I mean like I'm like oh shit I forgot about that So I was watching porn in like early elementary school like first grade and second grade Like because we had like a communal porn box Like my dad my dad my dad had this like fucking fucking old school water heater box and just stacked with fucking porn right So you kids don't know about this but we had like the communal VCR So like you would go to you would go to watch Aladdin you know and all of a sudden like B fuckers 29 is on the TV So I started watching porn when I was like I don't know I was jerking off to fucking third grade dude my fucking third grade teacher But like but I was surrounded by that right So so already I'm at this moral decay and it was like and I was the odd one I was the odd one man Like I had to go fucking find the porn I had to go fucking My brother always jokes My brother always jokes that like when he would like take my dad's porn tape out of the VCR he would always have to rewind it to where he started So no one knew he was watching porn But then he jokes he said oh man I always know where my dad's coming Now you know when you come you just shut the fucking thing up gross But so yeah right Fucking dude my dad was fucking I'm surprised I'm a lot more fucked up But you know so what I'm saying Is he alive now He died of cancer is actually fucking yeah I fucking get on I'll tell But it it's kind of funny Um Like so I'm an oddity I'm an odd I'm jerking off

I'm a little fucking kid You know I'm an oddity like I'm I'm fucking violent But now but now dude you give a little kid a cellphone and you have two parents working next thing you know I mean you fucking go on Instagram you got titties in your face Like now we're like hyper sexualizing kids And I I think that's also a big moral decay because the moment you become hyper sexualized and I can't stop thinking about fucking pussy and dick like it starts fucking your brain up at such a young age And it's a very unusual way to give it to kids where they have instant access to watching porn on their phone and we have no morals There's no there's no reason not to be a shitty person these days you ain't going to heaven Just fucking go fucking fuck the chick come in her like you don't got to raise your fucking kid So I think one of the best things we can do as society is mitigate mitigate sex because that is like the gateway to like that's why we want to make money That's why kids wanna sell drugs That's why kids wanna go fucking party There is no fucking pussy like you know no one no one fucking like no one If like if there is no fucking pussy no one's going to a party Like what the fuck Why do I wanna go to a party and drink I'm gonna go to get fucking pussy you know Yeah I always joke I say no one shoots up a school because they have too much fucking pussy That's true But there are some good things about it There are some good things about it Oh for sure There's good things about it But it is weird when it's like hyper sexualizing kids it's not good And then like you go and you see fucking kids these days like the shit they wear like fucking dude put some fucking clothes on you fucking like 16 your fucking titties are out They're being told that that's what gets some attention you know and they're being they see it all the time on Instagram when a girl has like 5 million followers and every photo is a picture of her assholes hanging out and shit You know fuck dude it's crazy Norman nor mcdonald I loved him I fucking love Norman He's a great guy man I love this skit about like being famous He's like what do we have to do after they went to the moon You know like you had to go to the moon to be famous now you just show your fucking asshole dude Fucking there we go man
