The Joe Rogan experience That's one of the things that they were really worried about when those murder hornets showed up the murder hornets That was a fun time Great band especially the fucking rocking the band I'd wear a bandanna that had their shit on it That's how you know you're into the band when you show up like dog the bounty hunt Um I think some of them were invasive but some but obviously they know what the fuck they're doing They they go in there and they murder everybody I mean that's the definition of invasive is eating someone's young after you crush them and eating 30 killing just chopping the heads off 30,000 of them invasive murder hornets are officially back in the US Entered the slaughter phase Was this the purge Oh my God So those are the ones man did you know that hornets pollinate too Uh They have to do something they pollinate I figure they serve some purpose out there They just don't make honey I don't think I know my grandmother had murder ho honey all day I want to get some murder hornet honey What about that Honey They had honey I have some You want some right now Yeah we could do it What's it gonna do to us You're gonna freak out a little bit We have those shows this evening What are you worried about I know the guy who owns the club We're fine Um honey Mad honey It's up there somewhere Yeah Where did you get your hands on murder honey Mad honey It's mad honey It's from Nepal It's those guys that have seen the honey psychedelic is a strong word for what I experienced what you experience I didn't take much So I just experienced like a light euphoria It was kind of interesting Apparently if you go too much it's really rough I love euphoria Great show Great feeling I haven't watched it but I do enjoy the feeling You should watch some snippets of it I'll send you some clips isn't it Like a bunch of kids banging each other Yeah But they're of age legally Yeah It's not it's not just the fucking deleted scenes from Epstein's disc Let me see it It's like it's broken So do you think we shake it De Toros Scary I never fucked with that Have you fucked with that No dude De Toro it melts people's brains Des uh Terence mckenna He wore off of it when he was talking to a guy in an open air market and the guy thought that they were back at his house in the living room and he realized somewhere along the line of the conversation the guy didn't know where he was like right now in the moment in an open air market he thought that he was in his apartment That sounds like a fun thing to do here on the podcast buddy Hey man you're here Let's freak it out in Texas I know they love uh Mad honey here he got uh stopped at the uh um ts
