

NAHMIER ROBINSON | COLORADO FOOTBALL Ø<BÈ

Uh my name is Le Robinson I'm from Seattle Washington and I go to the University of Colorado and I played football Um I feel like growing up uh I like a lot of mentors like uh my dad he was a big influence on me too Uh He's just you know just always install you know working hard I was like one of the first things that you can do like as an athlete like that's like one of the core values you need you know if you wanna go far as athlete is a little So um I would say can't be skipping reps you know I would definitely say you know having a teammate with you that works just as hard as you that pushes you like a rival kind So you guys can just stay on top of each other and you know keep pushing each other to get better and better each day Um That really helped me a lot and you know just competing with everybody I practice I feel like trans translated over for the game for me and you know just just giving your all 100% of guitar Um I would say Jamal Crawford like I grew up with him he's like my uncle So we went to we went to the same high school He's like a love And I and he always told me you know to be myself and play my game So you know I just took that you know going forward So it just helped me to like cause I could take parts of his game or like my dad's game or whatever my mentor was at the time of their game to translate over to football whatever sport I was playing at that time So I just feel like that helped me a lot just to open up my game Um I'll probably say it's my height for sure because like if you're short man you gotta be you know you gotta be nervous you gotta be a dog So they don't want no short guy that you know that can't you know play hard with heart and that's what I try to play with Like all the time every time I step on the field you know I'm gonna give them all regardless of like what nobody says or who I'm going against It can be I'm going against the shortest dude talking but I'm gonna still get them all So um I would say my instincts but a big play in that and you can't be thinking like if you're thinking so much like on the few you're just gonna it's like you're you're gonna triple in your own foot and shoot yourself in the foot So you just gotta trust your instincts at the end of the day and just you know uh just play hard You can't be thinking about like who's gonna be able to gain or like what coach you won't be able to gain because that may affect your play Uh but you just gotta think about another game because you've been you know you've been playing this sport your whole life So you know what's another game to you just go out there you know and do your thing Um and just go back to like your training you work so hard for

like if you're working every day like that's gonna come out to play like when just a few So I say just remind on that you know just do your thing Don't worry about what everyone else says or anything like that Um I'll say my recruiting process was it was like kind of late towards my senior year So I was like getting like off and stuff at the end of like after football season So it was kind of late but my parents were a little worried but um you know I wasn't worried too much because I was like this I know I was gonna find a home wherever but um I would say for the recruiting process like all glitter is and gold So some of the stuff that they're telling you might not always be true So they definitely wanna you know see your options and stuff like that So but uh I think commitment is like the biggest part Um that's I feel like what I have here the most out of Colorado with coach Ryne So I just like the way he runs things and it's like old school So like and I was like my dad's favorite player growing up So it's just a dream come true to play for a coach Like him I feel like he's the best you know the best to ever touch a few in my opinion in NFL So it just it just feels good to play for the best I would say you know play on a chop on my shoulder because he likes that kind of stuff like when we're talking mad to like the teammates or the uh the other team you know just being a dog and being you uh is like the biggest thing like I've seen from him like learned from him and you know just being consistent So those like those are the main things I will say as much time I put him on the field you wanna put him as uh in the classroom with academics as well So you just stay on top of everything Uh And like for me I do in person classes So cause I'm like a kinesthetic learner So like I learn better when I'm in person Like what what teaching me So that just works best for me and like doing the homework part you just gotta commit and apply yourself because I feel like that was a problem for kids in high school Uh So I just feel like you just got up by yourself you know just stick to it because I know not everyone wants to do school because by myself I really don't want to do school but it's a part of you know playing sports Like if you wanna go further in your career you gotta do academics as well So it's just supporting us playing on the field if there's anything else Um I would say especially if you're you're a short guy you know it's always hard over height So you always gotta be working harder than the next person You can't let no one work harder than you ever So you just gotta you just gotta make them see you you gotta stand out So at the same time you always gotta be yourself You can't you know it's it's good to you know as long as you're copying the right cat it's OK like you can bring stuff from other people's game to your game So but just try to be

yourself and he always have to work harder than everybody So um I would say confidence for sure because I was like in a little bug you know I kind of cared about what people thought like growing up a little bit and you know my dad saved me to get that out of my system So you know once I got that on my system I started playing like way better like playing like myself So because I played multiple sports in high school so just you know I can apply that to all the sports that I played So it was just you know that confidence is in your in your uh in your head So that's psychological can really mess you up as well So it's just as important as your physical Uh So because I I guess gets your body going can't start without your mind So I say that plays a big part I will say uh out of high school So I play basketball as well Um But I didn't really have like you know offers in basketball like that So I just take what you know what was going for me at the time even though I loved basketball just as much as football So because they didn't really want a short guy like that But um I just kept working and like just me choosing football I feel like it's the best thing I could possibly do So and like that's just that my first love football So my dad played football in uh in college but he ended up switching to basketball So but I still enjoy football I love football So I just I wanna go to them and that's my dream So I'm trying to make it to the next level and I'm gonna do anything that it takes to get there
