Summary

In this video, Jason Waller discusses Cure Addiction Now and the need for more research to find a cure for addiction. He highlights the leading cause of death in America for individuals under 50 years old and the lack of focus on the brain and neuroplasticity in addiction research. Waller emphasizes the impact of the COVID-19 pandemic on addiction and the importance of prevention, education, and normalizing conversations about addiction. He also addresses the deeper issues underlying addiction and the predicted increase in addiction in the future. Overall, the key takeaway is the need for open conversations and preventive measures to address the addiction problem in society.

Silo sample questions

- What is Cure Addiction Now?
- What is the leading cause of death in America for individuals under 50 years old?
- How has the COVID-19 pandemic affected the addiction problem?
- What is the average age of first-time drug use?
